The property values are stable. Demand is sufficient to absorb the supply of listed properties. Typical marketing periods appear to be within three to six months. Financing is available from a variety of sources, typically conventional and some FHA. The subject property is located in an established subdivision in Miami Dade. All of the preferred neighborhood amenities such as schools, houses of worship and recreational facilities are located within a reasonable proximity. The appraiser is not aware of any conditions which would have an adverse affect on real estate value or marketing times.

Prior Services

I, Jorge Cruz, have not performed any valuation services or any other services on the subject property within the three year period immediately preceding acceptance of this assignment.

Exposure Time

Exposure time as defined by USPAP is the estimated length of time that the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal. Based on the opinion of market value given; it's the appraisers opinion that the reasonable exposure time is three to six months.

Predominant Value

The predominant value for a market area is the most often found after disregarding isolated extremes at either end of the price spectrum. It should be noted that the subject is not identical to the predominant value of the subject's market area. This market is composed of a wide range of property types, varying in size, quality, condition and price. The range of property values is typical of the area and marketability on all the value ranges in this market is average. Therefore, any deviation from the predominant value should not have an adverse affect on marketability or market value of the appraised property.

Sales Comparison Approach

The appraiser had adequate data to develop a reliable sales comparison approach. The sales used were considered the most similar to the subject and are considered the better market indicators for the opinion of market value given.

Additional Comments

No personal property was considered in the opinion of market value.

No liability is assumed for the structural or mechanical elements of the property.

No warranties are given or implied for the quality of construction or workmanship of the structure.

The digital photographs used in this appraisal report were not modified or altered in any way shape or form.
