To whom it may concern:

The proposed architectural style is Mediterranean Contemporary. The architectural language is unified by its classical elements along with the massing's articulation providing vertical and horizontal definition to base, tower and penthouse areas. In addition, the proposed pedestrian realm has been designed with continuous classical details such as cornices, stone veneers, column grids and extended public landscaped / hardscaped areas, all enhancing the pedestrian experience.

This is also an original design and not a duplicate of an existing project or building.

Sincerely,

Don Sackman, AIA
