*****COURTESY 1-YEAR NOTICE*****

Notice of Required Inspection for Recertification of 30 Years or Older Building

Dear Property Owner:

Per the Miami-Dade County Property Appraiser's office the above referenced property address is thirty (30) years old, or older, having been built in 1990. In accordance with the Miami-Dade County Code, Chapter 8, Section 8-11(f), a qualified individual must inspect said building and a **completed** Recertification Report ("Report") must be submitted by you to this Department **in 2024**. A completed Report includes 1) Cover letters stating the structure meets (or does not meet) the electrical and structural requirements for recertification, 2) Building Structural Report, 3) Building Electrical Report, 4) Parking Lot Illumination Standards Form 5) Parking Lot Guardrails Requirements Form, and 6) (For threshold buildings only) Self-qualification letters from the inspecting engineers with accompanying DBPR proof of specialization. Submittal of the Report does not constitute recertification; it must be **approved** and the Letter of Recertification must be issued by this Department.

Threshold buildings (i.e. buildings greater than 3 stories or greater than 50 ft tall, or with an Assembly Occupancy > 5000 s.f. & Occupant load > 500 people) shall be recertified by Structural and Electrical Professional Engineers only. Self-qualification letters will be required with proof of DBPR structural and electrical specialization.

Any buildings that are not threshold buildings may be recertified by any Florida Registered Architect or Professional Engineer and self-qualification letters will not be required.

If no deficiencies are identified, the structure will only be recertified once the reports and forms have been submitted and approved.

If deficiencies are identified, they shall be reported to the Building Official within 10 days, or within 24 hours if there is an immediate danger identified. A completed report shall be submitted to this Department. In addition, a structural and/or electrical affidavit from the inspector will be required, with additional affidavits every 180 days, as needed so that the building can continue to be occupied while repairs are carried out. The Building Official is able to grant an extension of one hundred fifty (150) calendar days from the due date or the date the deficiencies were identified (whichever is sooner) to allow time to obtain the necessary permits and perform the repairs. The structure will only

RE: 721 BILTMORE WAY
FOLIO # 03-4117-035-0001

Notice of Required Inspection For Recertification of Building
Process Number: **TBD**

Dear Property Owner:

Per the Miami-Dade County Property Appraiser's office the above referenced property address is thirty (30) years old, or older, having been built in 1990. In accordance with the Miami-Dade County Code, Chapter 8, Section 8-11(f), a qualified individual must inspect said building and a **completed** Recertification Report ("Report") must be submitted by you to this Department within **ninety (90) calendar days** from the **date of this letter**. A completed Report includes 1) Cover letters stating the structure meets (or does not meet) the electrical and structural requirements for recertification, 2) Building Structural Report, 3) Building Electrical Report, 4) Parking Lot Illumination Standards Form 5) Parking Lot Guardrails Requirements Form, and 6) (For threshold buildings only) Self-qualification letters from the inspecting engineers with accompanying DBPR proof of specialization. Submittal of the Report does not constitute recertification; it must be **approved** and the Letter of Recertification must be issued by this Department.

Threshold buildings (i.e. buildings greater than 3 stories or greater than 50 ft tall, or with an Assembly Occupancy > 5000 s.f. & Occupant load > 500 people) shall be recertified by Structural and Electrical Professional Engineers only. Self-qualification letters will be required with proof of DBPR structural and electrical specialization.

Any buildings that are not threshold buildings may be recertified by any Florida Registered Architect or Professional Engineer and self-qualification letters will not be required.

If no deficiencies are identified, the structure will only be recertified once the reports and forms have been submitted and approved.

If deficiencies are identified, they shall be reported to the Building Official within 10 days, or within 24 hours if there is an immediate danger identified. A completed report shall be submitted to this Department. In addition, a structural and/or electrical affidavit from the inspector will be required, with additional affidavits every 180 days, as needed so that the building can continue to be occupied while repairs are carried out. The Building Official is able to grant an extension of one hundred fifty (150) calendar days from the due date or the date the deficiencies were identified (whichever is sooner) to allow time to obtain the necessary permits and perform the repairs. The structure will only be recertified once a *revised* report and all required information is submitted and approved, and all required permits are closed.

Proprietary or modified recertification forms from the inspectors will not be accepted. Only current municipal recertification forms will be accepted. The Architect or Engineer shall obtain the required Forms from the following link:

<https://www.miamidade.gov/global/economy/building/recertification.page>.

If this is your first time using the online system, please register at the following link:

<https://coralgablesfl-energovpub.tylerhost.net/Apps/selfservice/CoralGablesFLProd#/register>

You can access your online process using the process number provided above at the following link:

<https://coralgablesfl-energovpub.tylerhost.net/Apps/SelfService#/myWork?tab=MyPermits>

The Recertification Report fee of \$500.00 and additional document and filing fees shall be paid online at the following link:

<https://coralgablesfl-energovpub.tylerhost.net/Apps/SelfService#/payinvoice>

Failure to submit the required Report within the allowed time will result in **declaring the structure unsafe** and referring the matter to the City's Construction Regulation Board ("Board") without further notice and a \$600.00 administrative fee will be imposed at that time. The Board may impose additional fines of \$250.00 for each day the violation continues, may enter an order of demolition, and may assess all costs of the proceedings along with the cost of demolition and any other required action.

Please contact Douglas Ramirez at dramirez@coralgables.com regarding any questions concerning building recertification.
Thank you for your prompt attention to this matter.

Manuel Z. Lopez, P.E.

RE: 721 BILTMORE WAY
FOLIO # 03-4117-035-0001

Notice of Required Inspection For Recertification of Building – **OVERDUE NOTICE**
Process Number **RECT-xx-xxxx**

Dear Property Owner:

In a certified letter dated 10/1/2024, this Department notified you the property referenced above requires Building Recertification pursuant to Miami-Dade County Code, Chapter 8, Section 8-11(f). The letter informed you it was necessary to submit to this Department a completed Report prepared by a qualified individual within ninety (90) calendar days certifying the structure meets the requirements for recertification.

Please be advised the submittal of the Report is overdue and the **structure has been deemed unsafe** due to non-compliance. This may result in the revocation of the Certificate of Occupancy, as well as being subject to other penalties as provided in the Code. A completed Report includes 1) Cover letters stating the structure meets (or does not meet) the electrical and structural requirements for recertification, 2) Building Structural Report, 3) Building Electrical Report, 4) Parking Lot Illumination Standards Form 5) Parking Lot Guardrails Requirements Form, and 6) (For threshold buildings only) Self-qualification letters from the inspecting engineers with accompanying DBPR proof of specialization. Submittal of the Report does not constitute recertification; it must be **approved** and the Letter of Recertification must be issued by this Department.

See original notice for additional information.

Failure to submit the completed Report within thirty (30) calendar days from the date of this letter will result in forwarding the matter to the City's Construction Regulation Board for further review and determination. A \$600.00 administrative fee will be imposed at that time. The Board may impose additional fines of \$250.00 for each day the violation continues, may enter an order of demolition, and may assess all costs of the proceedings along with the cost of demolition and any other required action.

If this is your first time using the online system, please register at the following link:

<https://coralgablesfl-energovpub.tylerhost.net/Apps/selfservice/CoralGablesFLProd#/register>

You can access your online process using the process number provided above at the following link:

<https://coralgablesfl-energovpub.tylerhost.net/Apps/SelfService#/myWork?tab=MyPermits>

The Recertification Report fee of \$500.00 and additional document and filing fees shall be paid online at the following link:

<https://coralgablesfl-energovpub.tylerhost.net/Apps/SelfService#/payinvoice>

Please govern yourself accordingly.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Manuel Z. Lopez', with a stylized flourish at the end.

**NOTICE OF UNSAFE STRUCTURE VIOLATION FOR FAILURE TO RECERTIFY
AND NOTICE OF HEARING**

Date: October 9, 2025

Re: 721 Biltmore Way, Coral Gables, FL 33134, THE BILTMORE REGENT CONDO, CORAL GABLES BILTMORE SEC, LOTS 24 THRU 32 BLK 1 PB 20-28, and 03-4117-035-0001 ("Property").

The City of Coral Gables ("City") Building Official has inspected the records relating to the Structure in accordance with Article III, Chapter 105 of the City Code, pertaining to unsafe structures, and Section 8-11 of the Miami-Dade County Code, as applicable in the City, pertaining to existing buildings. **The Structure is hereby declared unsafe** by the Building Official and is presumed unsafe pursuant to Section 105-89 10 (m) of the City Code for failure to timely comply with the maintenance and recertification requirements of the Florida Building Code or Section 8-11 of the Miami-Dade County Code.

Therefore, this matter is set for hearing before the City's Construction Regulation Board ("Board") in the Fairchild Tropical Board Room, 427 Biltmore Way, 1st Floor, Coral Gables, Florida 33134, on October 20, 2025 at 2:00 p.m.

You may appeal the decision of the Building Official to the Board by appearing at the hearing. You have the right to be represented by an attorney and may present and question witnesses and evidence; however, formal rules of evidence shall not apply. Failure to appear at the hearing will result in the matter being heard in your absence. Please be advised that if someone other than an attorney will be attending the hearing on your behalf, he or she must provide a power of attorney from you at the time of the hearing. Requests for continuance must be made in writing to, Analyn Hernandez, at City of Coral Gables, Development Services Department, 427 Biltmore Way, Coral Gables, FL 33134, ahernandez2@coralgables.com, tel: (305) 460-5250. The Development Services Department's hours are Monday through Friday, 7:30 a.m. to 2:30 p.m.

If the Required Action is not completed before the above hearing date, the Building Official may order that the structure be vacated, boarded, secured, and posted (including but not limited to, requesting the electric

City's Exhibit #5

utility to terminate service to the Structure) to prevent further occupancy until the Required Action is completed. The Building Official may also order demolition of the Structure and the City may recover the costs incurred against the Property and the Owner of record.

If the Property owner or other interested party does not take all Required Action or prevail at the hearing, the Construction Regulation Board may impose fines not to exceed \$250 for each day the violation continues past the date set for compliance and may also enter an order of demolition and assess all costs of the proceedings, in an amount not less than \$600, and the costs of demolition and other required action, for which the City shall have a lien against the Property owner and the Property.

Please govern yourself accordingly.

Analyn Hernandez

Analyn Hernandez
Secretary to the Board

ADA NOTICES

Any person who acts as a lobbyist pursuant to the City of Coral Gables Ordinance No. 2006-11, must register with the City Clerk, prior to engaging in lobbying activities before the city staff, boards, committees and/or the City Commission. A copy of the Ordinance is available in the Office of the City Clerk, City Hall.

Pursuant to Section 286.0105, Florida Statutes, if a person decides to appeal any decision made by the Board, with respect to any matter considered at such hearing or meeting, he or she will need a record of the proceedings, and that, for such purpose, he or she may need to ensure that a verbatim record of the proceedings is made; which record includes the testimony and evidence upon which the appeal is to be based. Although a court reporter usually attends the hearing at the City's cost, the City is not required to provide a transcript of the hearing, which the Respondent may request at the Respondent's cost.

Any person who needs assistance in another language in order to speak during the public hearing or public comment portion of the meeting should contact the City's ADA Coordinator, Raquel Elejabarrieta, Esq., Director of Human Resources (E-mail: relejabarrieta@coralgables.com, Telephone: 305-722-8686, TTY/TDD: 305-442-1600), at least three (3) business days before the meeting.

Any person with a disability requiring communication assistance (such as a sign language interpreter or other auxiliary aide or service) in order to attend or participate in the meeting should contact the City's ADA Coordinator, Raquel Elejabarrieta, Esq., Director of Labor Relations and Risk Management (E-mail: relejabarrieta@coralgables.com, Telephone: 305-722-8686, TTY/TDD: 305-442-1600), at least three (3) business days before the meeting.

1. DESCRIPTION OF BUILDING

a. Name on Title: THE BILTMORE REGENT CONDOMINIUM

b. Building Street Address: 721 BILTMORE WAY

Bldg. #: 1

c. Legal Description: SEE ANNEX A

Attached: ☒

d. Owner's Name: THE BILTMORE REGENT CONDOMINIUM ASSOCIATION, INC.

e. Owner's Mailing Address: REFERENCE ONLY

f. Folio Number of Property on which Building is Located: 03-4117-035-0001

g. Building Code Occupancy Classification: R-2

h. Present Use: RESIDENTIAL

i. General Description of building (overall description, structural systems, special features):

The Biltmore Regent Condominium is comprised of a fourteen (14) story building with 24 residential units. Additionally, it includes a parking garage, lobby, pool and pool deck, and equipment rooms. The structural system of the building is a combination of concrete columns, beams, masonry walls, concrete joists, reinforced concrete slabs, and slab on grade. The building was built in 1990.

j. Number of Stories: 14

k. Is this a Threshold Building¹ as per 553.71(12) F.S. (Yes/No): Yes

l. Provide an aerial of the property identifying the building being certified on a separate sheet. Attached: ☒

m. Additional Comments:

The main roof is a combination of flat low-slope roof and gable roofs with clay barrel tiles.

n. Additions to original structure:	
N/A	
o. Total Actual Building Area of all floors: approx. 100,800 S.F.	

2. INSPECTIONS	
a. Date of Notice of Required Inspection: January 31, 2024	
b. Date(s) of actual inspection: March 19, 2024	
c. Name, license number, discipline of practice, and qualifications of licensee submitting report:	
Sinisa Kolar (P.E. FL#77112, FBRSE). Professional Engineer (Structural)	
d. Description of laboratory or other formal testing, if required, rather than manual or visual procedures:	N/A: ☒
e. Are Any Structural Repairs Required? (YES/NO): Yes	
1. If required, describe, and indicate acceptance:	
The basement garage and the generator & fire pump room exhibit signs of concrete cracks and spalling with exposed corroded rebar at the concrete beams, slabs, columns, and walls. The extent of damage is fair. See Annex C.	
f. Can the building continue to be occupied while recertification and repairs are ongoing? (YES/NO): Yes	
1. Explanation/Conditions:	
The distress observed at the time did not warrant a change in the pattern of occupancy and the damages found were considered "Less than Substantial."	
g. Is it recommended that the building be vacated? (YES/NO): No	
h. Has the property record been researched for violations or unsafe cases? (YES/NO): No	
1. Explanation/Comments:	

3. SUPPORTING DATA (Reference all photos indicated in report with corresponding section number)

- a. Annex A Number of Additional sheets of written data
- b. Annex B & C Number of Photographs provided (plus each building elevation)
- c. Annex B & C Number Drawings or sketches provided (aerial, site, footprint, etc.)
- d. N/A Number of Test reports attached

4. FOUNDATION

a. Describe the building foundation:

Not visible during inspection.

b. Is wood in contact or near soil? (Yes/No): No

c. Signs of differential settlement? (Yes/No): No

d. Describe any cracks or separation in the walls, columns, or beams that signal differential settlement:

PROVIDE PHOTO 4d

No signs of differential settlement observed during inspection.

e. Is water drained away from the foundation? (Yes/No/Needs Repair): Yes

f. Is there additional sub-soil investigation required? (Yes/No): No

1. Describe:

5. PRESENT CONDITION OF OVERALL STRUCTURE

a. General alignment: (Note: good, fair, needs attention, explain if significant)

PROVIDE PHOTO 5a

1. Bulging: Good

2. Settlement: Good

3. Deflections: Good

4. Expansion: Good

5. Contraction: Good

b. Portion showing distress: (Note, beams, columns, structural walls, floor, roofs, other)		PROVIDE PHOTO 5b
Concrete cracks and spalling were noted at the beams, columns, structural walls, and slabs located in the basement garage and at the generator and fire pump room. See Annex C.		
c. Surface conditions: Describe general conditions of finishes, cracking, spalling, peeling, signs of moisture penetration and stains.		PROVIDE PHOTO 5c
Evidence of cracked and spalled concrete with exposed corroded rebar at the basement garage and at the generator & fire pump room. Water ponding at the roof, corrosion at the roof flashing, and cracked and chipped tiles were noted at the mansard roof. Biological growth, rust spots, stucco delamination, missing sealant/grout at the railing posts, and cracked tiles at the balcony were also noted. Additionally, delaminated and deteriorated waterproofing noted at the parking garage deck. See Annex C.		
d. Cracks: Note location in significant members. Identify crack size as HAIRLINE if barely discernible; FINE if less than 1 mm in width; MEDIUM if between 1- and 2-mm width; WIDE if over 2 mm.		PROVIDE PHOTO 5d
Medium (1 - 2 mm)	Concrete cracks in parking garage's structural members varied from fine to medium at structural walls, columns, beams, and slabs. See Annex C.	
e. General extent of deterioration: Cracking or spalling of concrete or masonry, oxidation of metals; rot or borer attack in wood.		PROVIDE PHOTO 5e
Concrete cracks and spalling with exposed corroded rebar noted at the parking garage's walls, columns, beams, and slabs. Also, concrete spalling noted at the generator and fire pump room. See Annex C.		
f. Previous patching or repairs (Provide description and identify location):		PROVIDE PHOTO 5f
Previous repairs noted at the basement garage.		
g. Nature of present loading: (Indicate residential, commercial, storage, other.)		
Residential		
h. Signs of overloading? (Yes/No): No		
1. Describe:		

6. MASONRY BEARING WALL: (Indicate good, fair, needs repair on appropriate lines)		This Section is N/A: ☐	PROVIDE PHOTO 6
a. Concrete masonry units: Good			
b. Clay tile or terra cotta units: N/A			
c. Reinforced concrete tie columns: Fair			
d. Reinforced concrete tie beams: Fair			
e. Lintel: N/A

i. Cracks:			PROVIDE PHOTO 6i
1. Location (note beams, columns, other): Noted.			
2. Description:			
Concrete cracks in parking garage's structural members varied from fine to medium at structural walls, columns, beams, and slabs. See Annex C.			
j. Spalling As Noted Below			PROVIDE PHOTO 6j
1. Location (note beams, columns, other): Noted.			
2. Description:			
Concrete cracks and spalling with exposed corroded rebar noted at the parking garage's walls, columns, beams, and slabs. Also, concrete spalling noted at the generator and fire pump room. See Annex C.			

k. Rebar corrosion (indicate worst case by selecting one from lines 1-4):	PROVIDE PHOTO 6k
1. None visible: ☐	
2. Minor (patching will suffice): ☐	
3. Significant (but patching will suffice): ☐	
4. Significant (structural repairs required) ☒	Concrete cracks and spalling with exposed corroded rebar were noted at the parking garage's walls, columns, beams, and slabs, and at the generator & fire pump room's slab.
l. Samples chipped out for examination in spalled areas (Yes/No): No	
1. Yes – describe color, texture, aggregate, general quality:	

7. FLOOR AND ROOF SYSTEM	
a. Roof (Must access and provide)	
1. Describe (roof shape, type roof covering, type roof deck, framing system, condition):	PROVIDE PHOTO 7a1
The main roof includes flat low-slope and gable roofs covered with clay barrel tiles and a silicon base resurfacing at the lower flat roofs, and bitumen membrane at the porte-cochere roof. The main roof was noted with cracked and chipped tiles. The flat roofs were noted with water ponding and corrosion of roof flashings. The roofing system of the main roof consists of wood trusses and wood decking. The roof is in fair condition. See Annex C.	
2. Note water tanks, cooling towers, air conditioning equipment, signs, other heavy equipment and condition of supports:	PROVIDE PHOTO 7a2
Roof equipment is in fair condition, with minor corrosion and ponding water. See Annex C.	
3. Describe roof drainage system, main and overflow, and indicate condition:	PROVIDE PHOTO 7a3
The low slope flat roof drainage system is via roof drains and primary scuppers. The roof drains were noted with minor corrosion. The roof drainage is in fair condition. See Annex C.	
4. Describe parapet build and current conditions:	PROVIDE PHOTO 7a4
The roof concrete parapet walls are covered with stucco finishes and in good condition.	
5. Describe mansard build and current conditions:	PROVIDE PHOTO 7a5
The hip roof consists of clay barrel tiles and is in fair condition, with cracked and chipped tiles. See Annex C.	

6. Describe roofing membrane/covering and current conditions:	PROVIDE PHOTO 7a6
The roofing membrane is covered with silicon base coating resurfacing and bitumen membrane at the porte-cochere roof and is in fair condition, with noted water ponding stains. See Annex C.	
7. Describe any roof framing member with obvious overloading, overstress, deterioration or excessive deflection:	PROVIDE PHOTO 7a7
None noted.	
8. Note any expansion joints and condition:	PROVIDE PHOTO 7a8
Horizontal expansion joints were noted with cracks and deterioration and are in fair condition.	
b. Floor system(s):	
1. Describe the floor system at each level, framing, material, typical spans and indicate condition:	PROVIDE PHOTO 7b1
Floor system consists of reinforced concrete slabs at each floor, and is in fair condition with some localized spalled and delaminated concrete at the slab and ceiling of the parking garage and the generator & fire pump room. See Annex C.	
2. Balconies: Indicate location, framing system, material, and condition:	N/A: ☐ PROVIDE PHOTO 7b2
Balconies located at residential units with tiles at the slab, rough stucco finishes at the walls, and wrought iron railings and brackets with a core-drilled post embedded at the slab. The balconies are in fair condition with observed stucco delamination, rust spots at slab edges, biological growth and stains, pitting corrosion at railing posts, and cracked tiles. See Annex C.	
3. Stairs and escalators: indicate location, framing system, material, and condition:	N/A: ☐ PROVIDE PHOTO 7b3
Stairs located at each end of the building. All stairs are concrete stairs with an aluminum railing and are in good condition. See Annex C.	
4. Ramps: indicate location, framing type, material, and condition:	N/A: ☐ PROVIDE PHOTO 7b4
Ramps are located at the parking garage (East and West side) and are reinforced concrete. The ramps are in fair condition, with localized concrete cracks and spalling with exposed corroded rebar at the ceiling slab. See Annex C.	
5. Guardrails and handrails: describe type, material, and condition:	N/A: ☐ PROVIDE PHOTO 7b5
Guardrails are located in balcony railings at all elevations of the building. Handrails at the stairs located at each end of the building (East and West elevation). Guardrails and handrails are in fair condition, with observed pitting corrosion and missing sealants. See Annex C.	
c. Inspection – note exposed areas available for inspection, and where it was found necessary to open ceilings, etc. for inspection of typical framing members.	
Building facade and common areas were available during inspection.	

8. STEEL FRAMING SYSTEM		This Section is Not Applicable: ☒	
a. Description of system at each level:		PROVIDE PHOTO 8a	
b. Steel members: describe condition of paint and degree of corrosion:		PROVIDE PHOTO 8b	
c. Steel connections: describe type and condition:		PROVIDE PHOTO 8c	
d. Concrete or other fireproofing: note any cracking or spalling of encased member and note where any covering was removed for inspection:		PROVIDE PHOTO 8d	
e. Identify any steel framing member with obvious overloading, overstress, deterioration, or excessive deflection (provide location):		PROVIDE PHOTO 8e	
f. Elevator sheave beams and connections, and machine floor beams: note condition:		N/A: ☐	PROVIDE PHOTO 8f

9. CONCRETE FRAMING SYSTEM		This Section is Not Applicable: ☐	
a. Full description of concrete structural framing system:		PROVIDE PHOTO 9a	
The structural system of the building is a combination of concrete columns, beams, precast concrete joists, masonry walls, and reinforced concrete slab and slab-on-grade. The foundation consists of concrete footings, pile caps, and grade beams.			
b. Cracking		PROVIDE PHOTO 9b	
1. Significant ☒ or Not significant ☐ :			
2. Location and description of members affected and type cracking:			
Concrete cracks in parking garage's structural members varied from fine to medium at structural walls, columns, beams, and slabs. See Annex C.			

c. General condition		
Fair condition.		
d. Rebar corrosion – check appropriate line		
1. None visible: ☐		
2. Location and description of members affected and type cracking:	N/A ☐	PROVIDE PHOTO 9d2
3. Significant but patching will suffice:	N/A ☐	PROVIDE PHOTO 9d3
4. Significant: structural repairs required (describe):	N/A ☒	PROVIDE PHOTO 9d4
Concrete cracks and spalling with exposed corroded rebar were noted at the parking garage's walls, columns, beams, and slabs, and at the generator & fire pump room's slab.		
e. Samples chipped out in spall areas:		
1. No: ☒	PROVIDE PHOTO 9e	
2. Yes, describe color, texture, aggregate, general quality:		
f. Identify any concrete framing member (e.g. slabs and transfer elements) with obvious overloading, overstress, deterioration (e.g. efflorescence at underside of slab or at base of column or wall), or excessive deflection:		PROVIDE PHOTO 9f
N/A		

10. WINDOWS, STOREFRONTS, CURTAINWALLS AND EXTERIOR DOORS	
a. Windows/Storefronts/Curtainwalls/Skylights	PROVIDE PHOTO 10
1. Type (Wood, steel, aluminum, vinyl, jalousie, single hung, double hung, casement, awning, pivoted, fixed, other):	
Combination of impact and non-impact aluminum-framed fixed and single hung glass windows with accordion shutters and storefront windows. See Annex C.	
2. Anchorage: type and condition of fasteners and latches: Good	
Fair condition with corroded anchors, pitting frames and handles, and corroded door closer at the balcony doors. See Annex C.	

3. Sealant: type and condition of perimeter sealant and at mullions: <u>Good</u>	
4. Interiors seals: type and condition at operable vents: <u>Good</u>	
5. General condition: <u>Good</u>	
6. Describe any repairs needed:	
N/A	
b. Structural Glazing on the exterior envelope of Threshold Buildings (Yes/No): <u>No</u>	
1. Previous Inspection Date: <u>N/A</u>	
2. Description of Curtain Wall Structural Glazing and adhesive sealant:	
3. Describe Condition of System:	
N/A	
c. Exterior Swing and Overhead Doors	PROVIDE PHOTO 10c
1. Type (Wood, Steel, Aluminum, Sliding Glass Door, other):	
Exterior doors consist of aluminum-framed outswing glass doors with accordion shutters at the balconies and storefronts, and hollow metal doors for the common areas. See Annex C.	
2. Anchorage: type and condition of fasteners and latches: <u>Fair</u>	
Fair condition with corroded anchors, pitting frames and handles, and corroded door closer at the balcony doors. See Annex C.	
3. Sealant: type and condition of sealant: <u>Good</u>	

4. General condition: Fair
5. Describe any repairs needed: Repairs Required
Replacement of corroded anchors and door closer, and painting pitting frames and handles. See Annex C.

11. WOOD FRAMING	This Section is Not Applicable: ☒
a. Fully describe wood framing system:	PROVIDE PHOTO 11a
b. Indicate the condition of the following:	PROVIDE PHOTO 11b
1. Walls:	
2. Floors:	
3. Roof member, roof trusses:	
c. Note metal connectors (i.e., angles, plates, bolts, split pintles, other, and note condition):	PROVIDE PHOTO 11c
d. Joints: note if well fitted and still closed:	PROVIDE PHOTO 11d

e. Drainage: note accumulations of moisture	PROVIDE PHOTO 11e
f. Ventilation: note any concealed spaces not ventilated:	PROVIDE PHOTO 11f
g. Note any concealed spaces opened for inspection:	PROVIDE PHOTO 11g
h. Identify any wood framing member with obvious overloading, overstress, deterioration, or excessing deflection):	PROVIDE PHOTO 11h

12. BUILDING FAÇADE INSPECTION (Threshold Buildings)	This Section is N/A: ☐	PROVIDE PHOTO 12
a. Identify and describe the exterior walls and appurtenances on all sides of the building. (Cladding type, corbels, precast appliques, etc.)		
CMU walls with rough textured stucco and precast concrete panels and mouldings with simulated keystone finish. The building also has a gazebo and trellis.		
b. Identify the attachment type of each appurtenance type (mechanically attached or adhered):		
Mechanically attached and adhered.		
c. Indicate the condition of each appurtenance (distress, settlement, splitting, bulging, cracking, loosening of metal anchors and supports, water entry, movement of lintel or shelf angles, or other defects):		
N/A		

13. SPECIAL OR UNUSUAL FEATURES IN THE BUILDING	This Section is N/A ☐	PROVIDE PHOTO 13
a. Identify and describe any special or unusual feature (i.e. cable suspended structures, tensile fabric roof, large sculptures, chimneys, porte-cochere, retaining walls, seawalls, signs, etc.)		
The building has a porte-cochere. The porte-cochere roof consists of precast concrete balustrades.		
b. Indicate condition of the special feature, its supports, connections, and if repairs are required:		
N/A		

14. UNDERGROUND OR LOWER-LEVEL PARKING GARAGES	This Section is N/A: ☒	PROVIDE PHOTO 14
CHECKLIST ITEMS TO CONFIRM OR CONSIDER FOR UNDERGROUND PARKING GARAGE:		
14A. CURRENT BFE: _____ ft. (Select Datum)		
Note: All elevation datums provided must be in the same datum as the Flood Insurance Rate Map (FIRM).		
1. What is the wet season ² ground water elevation (water table): _____ ft. (Select Datum)		
2. What is the elevation of lowest parking garage finished floor: _____ ft. (Select Datum)		
3. What is the elevation of the parking garage entrance: _____ ft. (Select Datum)		
4. Is the wet season ground water elevation (water table) higher than the lowest floor elevation? Select (Yes or No)		
Explanation:		
5. Is the garage entrance elevation lower than the base flood elevation? Select: (Yes or No)		
Explanation:		
6. List use of structure above the underground portion of the parking garage. (e.g. parking, terrace, occupiable space):		
Describe:		
7. Does underground parking structure show any evidence of bulging, settlement, cracking or deflection? Describe:		
Describe:		

8. Describe general surface conditions (cracking, spalling, peeling, or staining)
Explanation:
14B.
1. Do the parking garage slabs (overhead and floor slabs) and/or walls show evidence of leakage (efflorescence at the underside of slab or at base of column)? (Yes or No):
Explanation:
2. Is there any evidence of previous patching or repairs? (Yes or No):
Explanation:

¹ **THRESHOLD BUILDING:** In accordance with *Florida Statute*, any building which is greater than 3 stories or 50 feet in height, or which has an assembly occupancy classification that exceeds 5,000 square feet in area and an occupant content of greater than 500 persons.

² **WET SEASON:** Compare the current Base Flood Elevation (BFE) on the latest FEMA Flood Insurance Rate Map (FIRM) with the October water table elevation shown in the Miami-Dade County Average Ground Water October maps available with the Miami-Dade Department of Environmental Resource Management (DERM)

RE: The Biltmore Regent Condo – 721 Biltmore Way, Coral Gables, FL 33134
Folio # 03-4117-035-0001_ 30/40 Year Electrical Recertification Report.
*Y:\Clients\Falcon2023\23-0346\002_30 Y Recertification\Electrical\L20240412 - Biltmore Regent_30 Yrs Cover Letter
Electrical Recertification.Docx*

Dear Building Official:

The Falcon Group (Falcon) conducted a 30-Year Electrical Recertification Inspection of the referenced building in accordance with the requirements of section 8-11(f) of Miami Dade County. In summary, the Electrical Recertification is not approved as electrical repairs are necessary to meet current standards of safety. **Please note that we have not identified any condition that represents an imminent danger to the occupants of the building.**

Please also note, this report is based upon sampling and is not intended to be an all-inclusive, exhaustive list of each location of repair, scope of work or otherwise. It is recommended the Client retain the services of an engineering firm to prepare project scope and specifications that will include proper detailing, materials, bidding forms and project requirements.

As a routine matter, in order to avoid possible misunderstanding, nothing in this report should be construed directly or indirectly as a guarantee for any portion of the structure. To the best of our knowledge and ability, this report represents an accurate appraisal of the present condition of the building based upon evaluation of observed conditions.

Please contact our office for any additional questions at (305) 663-1970.

Respectfully Submitted,

Jose J. Urdaneta, PE, FL #97604
Division Manager of MEP
The Falcon Group

**CERTIFICATION OF COMPLIANCE WITH PARKING LOT ILLUMINATION
STANDARDS IN CHAPTER 8C-3 OF THE CODE OF MIAMI-DADE COUNTY**

Date: April 10, 2024

Case No. _____ FYear 30

Property Address: 721 Biltmore Way, Coral Gables FL 33134, Bldg. No.: _____, Sq. Ft.: _____

Folio Number: 03-4117-035-0001

Building Description: The Building has one (01) stories cover level parking garage and one (01) open level parking.

1. I am a Florida registered professional ☒ engineer ☐ architect with an active license.
2. On, 04/10/2024 at 9:00 ☐ AM ☒ PM, I measured the level of illumination in the parking lot(s) serving the above referenced building.
3. Maximum 13.38 foot candle
Minimum 3.97 foot candle
Maximum to Minimum Ratio 3.37 : 1, foot candle
4. The level of illumination provided in the parking lot ☒ meets ☐ does not meet the minimum standards for the occupancy classification of the building as established in Section 8C-3 of Miami-Dade County Code.

a. Name on Title: THE BILTMORE REGENT	
b. Building Street Address: 721 Biltmore Way, Coral Gables, FL 33124.	Bldg. #: 1
c. Legal Description: THE BILTMORE REGENT CONDO CORAL GABLES BILTMORE SEC LOTS 24 THRU 32 BLK 1 PB 20-28 F/A/U 03-4117-008-0200	
d. Owner's Name: THE BILTMORE REGENT CONDOMINIUM ASSOCIATION, INC.	
e. Owner's Mailing and email Addresses:	
f. Folio Number of Property on which Building is Located: 03-4117-035-0001	
g. Building Code Occupancy Classification: R2 Multifamily	
h. Present use: R2 Multifamily	
i. General Description of building (overall description, structural systems, special features): The Biltmore Regent Condominium is comprised of a fourteen (14) story building with 24 residential units. Additionally, it includes a cover parking garage, lobby, pool and pool deck, and equipment rooms. The building was built in 1990.	
j. Number of Stories: 14	k. Is this a Threshold Building as per 553.71(12) F.S. (Yes/No): YES
l. Provide an aerial of the property identifying the building being certified on a separate sheet. Attached:	
m. Additional comments: The Biltmore regent consist of two (02) main services identified, one (1) Electrical meter room, one (1) generator and one (1) Electrical Fire pump. Out of the twenty-four (24) existing units, a total of eleven (11) were entered upon availability and were inspected to identify "typical" electrical deficiencies. Deficiencies noted in this report are assumed to be common and may be present in other similar circumstances. A qualified Electrical Contractor shall use this report as a guide to investigate and identify similar deficiencies which may be present throughout the building, including all residences, and rectify them under proper permits. The electrical Contractor shall bring new deficiencies to the attention of the Engineer of Record, and to the owner's representative.	

2. INSPECTIONS

a. Date of Notice of Required Inspection:	January 31, 2024
b. Date(s) of actual inspection:	03/19/24 to: 03/19/24
c. Name and qualifications of licensee submitting report:	Jose Urdaneta P.E. 97604
d. Are Any Electrical Repairs Required? (YES/NO):	YES
1. If required, describe, and indicate acceptance:	Refer to each section for explanation. All items to be repaired in accordance with the latest adopted edition of the NEC.
e. Can the building continue to be occupied while recertification and repair ongoing? (YES/NO):	YES
1. Explanation/Conditions:	The issues identified during the inspection do not represent an imminent danger to the occupants of the building.

B. If the elevator(s) travel below grade plane:	
1. Are they programmed to return to a level at or above BFE plus freeboard: Select: (Yes, No, Needs Repair, Will Retrofit):	Yes
Explanation: None.	
2. Are they equipped with sensors that prevent the cab from descending into a flooded hoistway? Select: (Yes, No, Needs Repair, Will Retrofit):	Yes
Explanation: None.	
3. Are the branch electrical circuits feeding devices below grade plane protected by a Ground Fault Circuit Interrupter (GFCI) breaker? Select: (Yes, No, Needs Repair, Will Retrofit):	Needs Repair
Explanation: Missing GFCI protection for receptacle below grade of elevator. See Annex "A", photo #28.	

29. ADDITIONAL COMMENTS

PROVIDE PHOTO

Out of the 24 existing units, a total of 11 were entered upon availability and were inspected to identify “typical” electrical deficiencies.

These deficiencies are assumed to be common and may be present in other similar circumstances. A qualified electrical contractor shall utilize this report as a guide to investigate and identify similar deficiencies which may be present in all units throughout the facility and rectify under proper permits. The electrical contractor shall also bring all deficiencies to the attention of the engineer of record, and the board’s representative.

The following table depicts the inferred percentages of incidence of the typical deficiencies found inside the units.

No	Description	Found	% Incidence	Units potentially affected	Devices potentially affected
1	Missing GFCI protection for receptacles in the kitchen	6	55%	14	28
2	Missing GFCI protection for receptacles in the bathrooms	4	36%	9	11
3	Missing GFCI protection for receptacles in the balcony	1	9%	3	4
4	Missing GFCI protection for receptacles on the Laundry	6	55%	14	14
5	Missing smoke alarm inside the sleeping rooms	6	55%	14	31
6	Missing smoke alarm outside of the sleeping rooms	1	9%	3	6
7	Smoke alarm location non-conforming	0	0%	0	0
8	Electrical panel: working space clearance violation	0	0%	0	0
9	Electrical panel: missing proper circuit directory	5	45%	11	11

1. Missing GFCI protection for receptacles in the kitchen. See Annex “A”, photo #29, photo #30, and photo #31.
2. Missing GFCI protection for receptacles in the bathroom. See Annex “A”, photo #32, and photo #33.
3. Missing GFCI protection for receptacles on the balcony. See Annex "A", photo #34.
4. Missing GFCI protection for receptacles in the laundry. See Annex "A", photo #35.
5. Missing smoke alarm inside the sleeping rooms. See Annex “A”, photos #36, and photo #37.
6. Missing smoke alarm outside the sleeping rooms. See Annex “A”, photos #38.
7. Missing smoke alarm location non- conforming. Not found in the inspected sample.
8. Electrical panel: working space clearance violation. Not found in the inspected sample.
9. Electrical panel: missing or incomplete proper circuit directory. See Annex “A”, photos #39, and photo #40.

RE: The Biltmore Regent Condominium, 721 Biltmore Way, Coral Gables, FL 33134
Folio # 03-4117-035-0001 - 30 Year Structural Recertification Report.
Y:\Clients\Falcon2023\23-0346\002_30 Y Recertification\01_Assessment\Documents\Assessment
Report\Recertification\L240322 -Biltmore Regent- 30YR Building Recertification Structural Summary.Docx

Dear Building Official:

Per your request, The Falcon Group ("Falcon") conducted a 30-year structural recertification of The Biltmore Regent Condominium, located at 721 Biltmore Way, Coral Gables, FL 33134, with the requirements of the City of Coral Gables and Miami-Dade County Code Section 8-11(f) 30-Year Minimum Inspection Procedural Guidelines for Building's Structural Recertification. Please refer to the attached copies of the structural 30-year recertification report for the subject The Biltmore Regent Condominium property. In summary, in accordance with the above Miami-Dade County guidelines and regulations, the structural 30-year recertification is **"Not Approved."** Concrete repairs are required to meet safety standards, primarily at the basement garage and at the generator & fire pump room.

Falcon conducted visual examinations of the building, at representative locations, of reinforced concrete beams, columns, reinforced concrete slabs, and masonry walls. Falcon noted some areas with isolated concrete deficiencies. The following observed issues are progressive in nature and must be properly repaired:

1. The basement garage demonstrated extensive cracking throughout its walls, beams, reinforced slabs, and ceiling. Additionally, Falcon noted concrete spalling and delamination at the concrete beams, slabs, and walls at the basement garage, as well as exposed rebar corrosion. These structural elements should be closely monitored for further spalling/delamination until rebar repair/reinforcement and concrete pouring and curing.
2. At the generator & fire pump room located at the ground level of the building, Falcon noted concrete cracking/spalling and delamination at the concrete slab with exposed corroded rebar.

Falcon's evaluation of the main roof also revealed signs of cracked and chipped roof tiles. Falcon noted the roofing system with ponding water and corrosion. Based on our observations, roof replacement is required in the near future. Falcon recommends that a roof moisture survey be performed to evaluate the level of moisture within the roofing membrane.

During the evaluation, Falcon noted the roof equipment to be in fair condition. Falcon observed ponding water and slight corrosion. Based on Falcon's inspection, corroded metal components must be painted/treated with proper surface preparation per manufacturer's requirements.

Falcon also noted missing sealants/grout and pitting corrosion at the railing post of the balcony. Falcon also observed stucco delamination, cracked tiles, biological growth, and corroded door closers at the

balconies. Overall, Falcon recommends replacement of sealant at the balcony railing post throughout to avoid water penetration into the structural slab.

The painted surface finish of the building appears to be deteriorating at some areas. Although it is not a structural item, painting and filling small (hairline / fine) cracks (if any) will extend the life of the structures greatly, as well as maintenance items such as replacing failed sealants at windows and doors.

Based on Falcon's inspection findings, the deficiencies in the structural elements of the building should be addressed as soon as possible to bring the structure back to its original pre-damage condition. However, the distress observed at the time did not warrant a change in the pattern of occupancy for the building and the damages found were considered "**Less than Substantial.**" It is our professional opinion that the building may remain occupied (with appropriate temporary partial access restrictions) during the necessary repairs. Please note that we have not identified any condition that represents an imminent danger to the occupants of the building.

Please also note that this report is based upon sampling and is not intended to be an all-inclusive, exhaustive list of each location of repair, scope of work, or otherwise.

As a routine matter, in order to avoid possible misunderstandings, nothing in this report should be construed directly or indirectly as a guarantee of any portion of the structure. To the best of our knowledge and ability, this report represents an accurate appraisal of the present condition of the building based upon evaluation of observed conditions, to the extent reasonably possible.

We would like to thank you for the opportunity to provide these professional services. Should you have any questions, please feel free to contact us.

Respectfully submitted,

Sinisa Kolar, PE

Regent -Electrically Safe To Remain Occupied.Docx

Building Department Official:

The Falcon Group (Falcon) conducted a 30-Year **Electrical** Recertification of the referenced building in accordance with the requirements of section 8-11(f) of Miami Dade County and City of Coral Gables "General Considerations & Guidelines" for the building safety inspections. In summary, in accordance with the above regulations and guidelines, the recertification is not approved since repairs are required to meet current standards of safety.

The building's owner is currently in the process of selecting a contractor to perform the necessary electrical repairs. At this point and based on current condition, the building continues to be "Safe to be Occupied" during the repair process. Falcon's authorized representatives will be conducting periodic inspections of the current electrical condition of the building.

As a routine matter, in order to avoid possible misunderstandings, nothing in this report should be construed directly or indirectly as a guarantee of any portion of the electrical infrastructure. To the best of our knowledge and ability, this report represents an accurate appraisal of the present condition of the building based upon evaluation of observed conditions, to the extent reasonably possible.

Please contact our office for any questions at (305) 663-1970.

CERTIFICATION OF COMPLIANCE WITH PARKING LOT GUARDRAILS

Re: Case No. _____ FYear 2024
Property Address: 721 BILTMORE WAY, Bldg. No.: 1, Sq. Ft.: 100,800
Building Description: RESIDENTIAL CONDOMINIUM

I am a Florida registered professional ☒ engineer ☐ architect with an active license.

On MARCH 26 2024, I inspected the parking lots servicing the above referenced building for compliance with Section 8C-6 and determined the following (check only one):

The parking lot(s) is not adjacent to or abutting a canal, lake, or other body of water.

The parking lot(s) is adjacent to or abutting a canal, lake or other body of water and parked vehicles are protected by a guardrail that complies with Section 8C-6 of the Miami- Dade County Code.

The parking lot(s) is adjacent to or abutting a canal, lake or other body of water and parked vehicles **are not** protected by a guardrail that complies with Section 8C-6 of Miami-Dade County Code. I have advised the property owner that he/she must obtain a permit for the installation of the guardrail and obtain all required inspection approvals to avoid enforcement action.

The analysis criterion of the failure of the component due to temperature difference is based on the ANSI/ NETA MTS standard / NFPA 70B, where the temperature of a component with possible failure is compared with a similar reference component under the same load conditions.

Temperature Differences of 1°C to 3°C	Indicate possible deficiency and warrant investigation
Temperature Differences of 4°C to 15°C	Indicate deficiency; repairs should be made as time permits
Temperature Differences of 16°C and above	Indicate major deficiency; repairs should be made immediately
