Miami, FL 33126

Dear Ms. Gonzalez :

CONGRATULATIONS!

Your application for certification as a Minority/Women Business Enterprise (M/WBE) is approved. The enclosed certificate becomes valid when bids are advertised within your area of specialty. The Purchasing Department has entered into an agreement with DemandStar.com a government bid service provider. Although it is not necessary to be registered with them to do business with the SBBC, being a member of the DemandStar.com network provides many benefits. For more information on DemandStar.com, you may contact them at (800) 711-1712 or at www.demandstar.com. If your firm is qualified in the construction arena please view <http://www.broward.k12.fl.us/constructioncontracts/home/home001.htm> for further assistance.

We encourage you to become an active bidder in the contracting and subcontracting opportunities with the School Board of Broward County. The following data reflects the manner in which your company is listed on the School Board's mainframe computer system.

Certificate Number: 7007-3870 - 02
Certification Status: Apr 30, 2012 until Apr 30, 2015
Minority Status: Hispanic-American (M/WBE)
Trade or Service: General Contractor

Your certification is valid for a three (3) year period, and it is subject to review in order to verify continued eligibility. Should any change occur which may adversely affect the minority status of your company, please notify the Supplier Diversity & Outreach Program Office within fifteen (15) calendar days. Failure to do so may result in de-certification of your minority/women certification status.

Should you have any questions regarding your certification status with the School Board of Broward County, I may be reached at 754-321-0550. Also, if there are any questions regarding your certification status with the Broward Health, they may be reached at 954-831-2795 and Broward County Board of County Commissioners at 954-357-7800.

Sincerely,

Marcy Houser

Re: New 2011-2013 Biennium Prequalification Confirmation Letter

Dear Mr. Gonzalez:

I have received the necessary corporate documents and licenses from your company, and verified their active status.

In accordance with Rule 60D-5.004, Florida Administrative Code, you are hereby advised that your firm's address has been updated in our records, and your firm is prequalified for bidding as Certified General and Plumbing Contractors from the date of this letter for the **New Biennium, which began July 1, 2011, and runs through June 30, 2013**, on projects advertised and administered by this Agency.

This letter of prequalification is valid for any project that is bid by the Department, or one of its agents, throughout the biennium. YOU DO NOT NEED TO PREQUALIFY FOR EACH PROJECT DURING THIS BIENNIUM; HOWEVER, YOU MUST PROVIDE A COPY OF THIS LETTER WITH EACH BID YOU SUBMIT.

It is your firms' responsibility to request renewal, and provide the proper documentation for verification, should any license(s) expire before June 30, 2013, in order to remain prequalified throughout the current period. I will need to receive a written request (fax or e-mail) from your firm to continue your prequalification status and must receive copies of your renewed Corporate Charter and Contractor license(s), or Certified Minority Business Enterprise (CMBE) status, if applicable.

Please be advised that prequalification with the Department of Corrections does not automatically prequalify your firm with other State Agencies.

Please include a copy of this letter with your response to bids, quotes, or submittals to the Department. This letter is good for ALL BIDS from now until 6/30/2013. See Paragraph 4 of this letter for renewal conditions. If you are also a CMBE, please include a copy of that Certificate along with the copy this letter.

Please note that the Florida Department of Corrections has moved and Procurement & Supply is now located with the rest of the Department at 501 South Calhoun Street, Tallahassee, FL 32399-2500.

If you have any questions or concerns, please call me at 850-717-3664, or you may fax documents to me at 850-488-7189. You may also contact me via e-mail at: rogers.sandra@mail.dc.state.fl.us.

Sincerely,

Sandra L. Rogers, Purchasing Agent III

Fax: (305) 267-2403

BACKGROUND

ABC Construction Inc. was established in 1990 in the State of Florida. It has been dedicated to quality and has grown to become one of South Florida's best construction companies. Since its inception, ABC Construction has built some of the finest residences, commercial properties and government projects.

One of the most important attributes of this company is the referral received from clients and professionals. Jorge Gonzalez, President and General Contractor of the company states, "The most important part of my work is customer satisfaction; it is the root of our business" and "because of them, we have grown tremendously". The company does not advertise and its client and job base is almost strictly by word of mouth. "This is the best reward for a job well-done", says Mr. Gonzalez. "Without the approval and referral of my clients and colleagues", we would not be here today.

ABC Construction offers a broad range of construction services including high-end custom houses, medium and high rises, retails and commercial shopping centers, airport facilities, demolition, etc. Projects completed include residences built for discriminating clientele such as diplomats and professionals as well as projects in Miami International Airport under the supervision of Miami-Dade Aviation Department for the South and North Terminal Development Programs, renovations for the State of Florida, construction of parks and recreational centers with Miami-Dade County Parks and Recreations. From high-end and custom homes to commercial construction and demolition, ABC Construction, Inc. is one of the most reliable General Contractors in Florida. The company strives to make the project run smoothly from start to finish. Its attention to detail is obvious when walking into a residence or even a demolition project. The workplace is kept clean and the work is completed in a safe and timely manner. 'All of these attributes are what have made ABC Construction, Inc. so successful all of these years'.

ABC Construction is proven a construction company that has established a "can do it well and on time" reputation required of a modern company who partners with their subcontractors and clients. We are a fully licensed, insured, and bonded corporation

with demonstrated financial resources, which pride ourselves in our performance in safety, environmental, quality standards, and project management.

Mission statement

ABC Construction will provide quality products and services on time and on budget, while insuring a good working relationship with our subcontractors and clients.

KEY PERSONNEL

ABC Construction personnel incorporate a variety of backgrounds, each bringing distinct professional experience to the team. ABC Construction offers the client a balanced "pool" of project managers, field supervisors, and foreman who have experience in the work they manage. These managers provide support for the skilled workers who represent ABC Construction to the client on a day-to-day basis. These include equipment operators, mechanics, skilled laborers, carpenters, electricians, and plumbers, to name a few.

President – Jorge Gonzalez is a License General Contractor from the State of Florida since 1990. Mr. Gonzalez has extensive business management experience in a variety of business disciplines, including twenty years of construction experience, project management, field supervision, quality assurance and cost control, budgeting, financial reporting, and forecasting, marketing and staff supervision.

Office Manager – Laura Gonzalez has seven years of administrative/management experience, including twelve years of construction experience. Mrs. Gonzalez is responsible for the day-to-day interface with staff, project leads, vendors, and all levels in the public, private and government sector. She manages the accounting and finance, payment requisitions, administrative requirements from employees, insurance, bonds, coordination with DBE and CSBE programs.

Lead Estimator – Jorge Gonzalez has more than twenty years of experience in construction of custom houses and residences & Commercial. Mr. Gonzalez is leading the preconstruction department, and has extensive experience in contract bidding and negotiation with clients.

Project Manager / Superintendent – Marcelo Pisano is a Civil Engineer and MS Construction Management with other recognized certifications in safety and environmental management. Mr. Pisano has several years of diversified engineering experience, including project management, project cost and scheduling, construction inspection, quality control and quality assurance, safety management. For the past two years Mr. Pisano has successfully completed all landside and airside projects built at Miami International Airport.

Assistant Administrative Officer – Janina Arellano has more than ten years of administrative experience. Mrs. Arellano is in charge of processing all project documentation, administration and bookkeeping.

Field Site Supervisor – Norberto Rodriguez is responsible for on-site personnel. Mr. Rodriguez has more than forty years of field construction experience in supervision and personnel management. Mr. Rodriguez has built high-end custom houses, high rise framing, drywall, finishes, interiors schools and parks facilities.

Field Site Supervisor – Pablo Arcia has over ten years of field construction experience in supervision and personnel management. Mr. Arcia has built end custom houses, high rise framing, drywall, finishes and interiors, schools, parks and airport interior finish packages. Mr. Arcia is a master drywall and interiors installer.

HEALTH & SAFETY QUALITY ASSURANCE & QUALITY CONTROL INFORMATION

Health & Safety

Safety is an integral part of our culture. Our Safety Program entails all aspects of safety awareness from general policies, operating practices and procedures, to job-specific training, project planning and hazard analysis. Our obligation for a safe and productive job site requires the understanding, commitment and action by every project team member. The prevention of occupationally induced injuries and illness is of such consequence that it will be given precedence over operating productivity when necessary. To the greatest degree possible, management will provide all mechanical and physical facilities required for personal safety and health in keeping with the highest standards. We will maintain a safety and health program conforming to the best practices of organizations of this type.

Safety Philosophy

ABC Construction's objective is a proactive program implementation that will reduce all safety-related losses to an absolute minimum surpassing the best experiences of operations similar to ours. Our goal is no zero accidents and injuries. It is to be on the left side of zero, managing prevention efforts instead of accidents.

Quality Assurance

The quality and validity of results can only be as good as the quality of data from which they are derived. In order to achieve the highest standards, we go above and beyond to insure quality assurance in our work. All members of ABC Construction are highly qualified and experienced in construction implementation processes. ABC Construction's high standard of reporting back to our clients is our trademark. Through careful analysis and explanation, we will provide a comprehensive breakdown of all quality assurance issues and documentation. Our aim is to help solve problems by actionable recommendations through quality documentation.

SERVICE SECTORS

Our principle service sectors are:

1. General Construction
 - Civil Site Work
 - Design/Build Construction
 - Framing and Drywall

2. Construction Management of new and restoration for
 - Residential
 - Commercial and retail
 - Airports Facilities
 - Mid rise and High rise buildings
 - Parks and recreation
 - Institutional

3. Demolition
 - Structural/Site
 - Concrete
 - Interior & Exterior

Our Clients

1. Government Agencies
 - Miami-Dade County Parks and Recreation
 - Miami-Dade County Aviation Department
 - City of Coral Gables
 - City of Miami

2. Private Sector

COMPANY SAFETY RULES

In order for a safety program to be effective, it is vital that rules be established, monitored by responsible individuals, and implemented by all levels of employment.

The following are some of the general rules applicable to ABC Construction Inc. operations that must be pertinent on every project contracted by our company. This is a partial listing only. The pertinent requirements of OSHA Regulations *CFR29, Part 1926 Safety and Health Regulations for Construction with CFR 29 Part 1910 Identified as Applicable to Construction*, also apply in this firm.

1. PERSONAL PROTECTION AND RELATED EQUIPMENT

- A. Personal Protective equipment must be worn as prescribed for each job by the supervisor.
- B. Employees must check with their supervisor(s) regarding any portion(s) of their job that they do not understand.
- C. Goggles, face shields, helmets and other comparable equipment are required to fit the eye protection shall be worn when there is any application. Appropriate eye protection shall be worn when there is any possibility of eyes being exposed to foreign materials. It is mandatory that appropriate eye protection be worn when drilling, grinding, sanding, sawing, burning, cutting, welding, chipping, working overhead or cutting into ductwork that is operating and under pressure.
- D. Hard hats must be worn by all employees at all times in all construction work areas.
- E. Gloves are to be used when handling materials, and for protection against acids and other chemicals which could injure employees skin. Welding gloves must be worn during flame cutting, brazing and welding operations.
- F. Respiratory equipment in many cases is needed for protection against toxic and hazardous fumes. Employees must verify with their supervisors which equipment meets the need for breathing safety.
- G. Safety shoes are recommended to help eliminate toe and foot injuries.
- H. The use of safety belts is required when performing elevated work where there is no guard rail protection and on certain suspended scaffolds.
- I. Employees are expected to utilize proper judgment in their personal habits. When they report to work each morning they must be in fit condition to meet daily obligations.

2. BARRICADES AND HOLE COVERS

- A. Excavations and operations in working surfaces must be protected with barricades or hole covers.
- B. Barricades and/or signs shall always be provided as warning of hazards such as overhead work, crane swing, and excavations.
- C. When a hole or floor opening is crated during the performance of a work activity, a cover or a barricade must be installed immediately.

3. FIRE PREVENTION

- A. When utilizing heat producing equipment, make sure that the area is clear of all fire hazards and that all sources of potential fires are eliminated.
- B. Do not use a salamander or other open flamed device in confined or enclosed structures. Vent heaters to the atmosphere and sure they are located an adequate distance from walls, ceilings and floors.
- C. Have fire extinguishers available at all times when utilizing heat-producing equipment.
- D. Know the location of the fire fighting equipment in the work area and have knowledge of its use and application. Use these devises only in cases of fire.
- E. Turn in all fire extinguishers for recharge after each use. Inspect periodically when not in use.

4. EXCAVATIONS

- A. Have supervisory personnel determine whether excavations, trenches or cuts more than 4 feet in depth require shoring, or some other hold-back means.
- B. Excavations must be checked daily for cracks, slides and scaling. During rain, snow and other hazardous weather conditions, checks should be performed more often.
- C. Heavy equipment must be kept back from edges of all excavations. The access for excavations shall be ladders or steps and should be located within 25 feet of any worker.

5. COMPRESSED GAS CYLINDERS

- A. All gas cylinders shall have their contents clearly market on the outside of each cylinder.
- B. Cylinders must be placed and secured in an upright position, including storage and transfer.
- C. Cylinder valves must be protected with caps or guards when not in use.
- D. All leaking or defective cylinders must be removed from service promptly, tagged as inoperable and placed in an open space from the work area.
- E. All operators are required to inspect equipment prior to utilization.
- F. Oxygen and gas cylinders placed in storage are to be kept 20 feet apt or have the fire barrier between them.
- G. Full and empty cylinders are to be stored separately and protected from excess heat, snow, ice or physical damage.

6. HOUSEKEEPING

- A. Proper housekeeping is the foundation for the safe work environment. It definitely prevents accidents and fires, as well as creating a business-like work area.
- B. Pile or store materials in a stable manner so that I will not be subject to falling.
- C. Rubbish, scraps and debris shall be removed from the work area as soon as practical.
- D. It is not permissible to leave materials and supplies in stairways, walkways, near floor openings or at the edge of the building when exterior walls are not built.

7. LADDERS AND SCAFFOLDS

- A. All employees are obligated to check to see that ladders are free from defects prior to use. Ladders must have safety feet.
- B. Straight ladders must be tied off, held or nailed down for stability.
- C. Erection crews must check scaffold member during erection. Defective parts are not to be used for scaffold fabrication.
- D. All working decks of scaffolds shall be provided with proper handrails, midrails and toeboards. If this is not possible, then all the time safety belts must be worn by employees working on the scaffold if 6 feet above floor.
- E. Planks shall extend over their end support to not less than 6 inches not more than 12 inches.
- F. Tube and frame scaffolds must be tied to the structure at intervals of 30 feet horizontally and 26 feet vertically.
- G. The height of mobile scaffolds shall not exceed four times the base dimension, and the casters shall have positive locking devices.

8. RIGGING

- A. Good rigging is essential for moving construction materials and equipment and, at the same time, keeping them under control.
- B. Never swing loads over the heads of workers in the area.
- C. Only trained flagmen and signalmen are to direct operation, using hand signals established as standards for the industry.
- D. Tag lines must be used to control lads and keep workers away.
- E. Do not overload any part of your rigging. Check loads just off the ground for stability before hoisting.
- F. Never leave a suspended load unattended without securing it.
- G. Never allow loads, booms or rigging to approach within 10 feet of energized electrical lines rated 50 KV, follow OSHA regulations.
- H. Always operate cranes on firm level ground or use mats, particularly for near capacity lifts.
- I. Rope off or barricade a space 360 degrees around all cranes operating on your jobsite to the extent of the swing radius of the near rotating structure.

9. WELDING AND BURNING

- A. Always clear area below cutting of welding operations so that you do not drop slag on hoses, cables or employees.
- B. Use leak proof welding helmets and burning goggles for the eye protection and to prevent flash burns. Always wear eye protection to guard against slag while chipping, grinding, and dressing of welds.
- C. Use only manual electrode holders specifically designated for arc welding.
- D. Make sure that all parts subject to electrical current are fully insulated against the maximum voltage encountered on ground.
- E. A ground return cable shall have a safe current carrying capacity equal to, or exceeding, the specified maximum output capacity or the arc welding unit that it services.
- F. Place cables, lads and connections so that there are no fore or tripping hazards.
- G. Shield all arc welding and cutting operations with noncombustible or flameproof screens wherever practical.
- H. Keep suitable fire extinguishers readily available when welding, cutting or heating on the job.
- I. Be sure that proper ventilation is provided whenever welding, cutting or hating is performed in a confined space.

10. TOOLS

- A. It is mandatory that the right tool be utilized for the job and that it be used in a correct manner.
- B. Kept tools in good working conditions. Damaged, worn or effective tools can cause injuries, and shall not be used.
- C. Do not use tools until you have been properly instructed and authorized to do so.
- D. Never remove machinery or equipment guards without authorization.
- E. Never make repairs to tools or equipment unless authorized by your supervisor.
- F. Inspect electrical extension cords and other wiring to be certain they are properly insulated. Do not use frayed or damaged cords.
- G. Take special precautions when using power tools on a scaffold or other locations with limited movement area. Get a good footing, use both hands, keep cords clear of obstructions, and do not over reach.
- H. Be sure that a power tools is off and motion stopped before setting tool down.
- I. Disconnect tools from power source before changing drill, blades or bits or attempting repair or adjustment. Never leave a running tool unattended.
- J. Do not use compressed air for cleaning purposes except when pressure is reduced to less than 30 psi and then only with effective chip guarding and proper personnel protective equipment.

11. INDUSTRIAL HYGINE AND OCUPATIONAL HEALH

- A. Potable water will be provided at all sites in approved closed containers disposable cups.
- B. Toilets will be provided as required for the number of workers, with self closing doors, latch, and toilet paper.
- C. First aid kits will be provided at ach job site.
- D. Employees must be protected against exposure to injurious sound levels by controlling exposure or by use of the proper personal protective equipment.
- E. Employees must be protected against exposure to ionizing (X-ray, radioactive) and non-ionizing (laser beam) radiation.
- F. Protection against exposure to harmful gasses, fumes, dust, and similar airborne hazards must be furnished through proper ventilation or personal respiratory equipment.

12. MOTOR VEHICLES AND MECHANIZED EQUIPMENT

- A. Supervisory personnel shall inspect all machinery and equipment prior to each use, and during use to make sure it is in safe operating condition.
- B. Rated load capacities and recommended rules of operation shall be conspicuously posted on all equipment at the operator's station.
- C. Wire rope shall be taken out o service when on of the following conditions exist:
 - i. In running ropes, 6 random distributed broken wires in on lay o 3 broken wires in one strand or one lay
 - ii. Wear of on-third the original diameter on outside individual wires.
 - iii. Kinking, crushing, hoist caging, heat damage, or any other damage resulting in distortion of the rope structure
 - iv. In standing ropes, more than two broken wires in one lay in sections beyond end connections, or more than one broken wire at an end connection
- D. When vehicles or mobile equipment are stopped or parked, parking brakes shall be set. Equipment on inclines shall have wheels chocked as well as having parking brakes set.

13. FIRST AID PROCEDURES

Please Note:

In all cases requiring emergency medical treatment, immediately call, or have a co-worker call, to request medical assistance.

Minor First Aid Treatment

If you sustain an injury or are involved in an accident requiring minor first aid treatment:

- A. Inform your supervisor.
- B. Administer first aid treatment to the injury or wound.
- C. If a first aid kit is used, indicate usage on the accident investigation report.
- D. Access to a first aid kit is not intended to be a substitute for medical attention.
- E. Provide details for the completion of the accident investigation report.

Non-Emergency Medical Treatment

For non-emergency work-related injuries requiring professional medical assistance:

- A. Inform your supervisor.
- B. Proceed to the posted medical facility. Your supervisor will assist with transportation, if necessary.
- C. Provide details for the completion of the accident investigation report.
- D. Management will report the injury to the insurance company within 24 hours.

Emergency Medical Treatment

If you sustain a severe injury requiring emergency treatment:

- A. Call for help and seek assistance from a co-worker.
- B. Use the emergency telephone numbers and instructions posted next to the telephone in your work area to request assistance and transportation to the local hospital emergency room.
- C. Provide details for the completion of the accident investigation report.
- D. Management will report the injury to the insurance within 24 hours.

First Aid Training

Each employee will receive training and instructions from his or her supervisor on our first aid procedures.

14. ACCIDENT INVESTIGATION

Accident Investigation Procedures

An accident investigation will be performed by the supervisor at the location where the accident occurred. The safety coordinator is responsible for seeing that the accident investigation reports are being filled out completely and that recommendations generated as a result of the investigation are being addressed. Supervisors will investigate all accidents resulting in an employee injury using the following investigation procedures:

- A. Review the equipment, operations, and processes to gain an understanding of the accident situation.
- B. Identify and interview each witness and any other person who might provide clues to the accident's causes.
- C. Investigate causal conditions and unsafe acts; make conclusions based on existing facts.
- D. Complete the accident investigation report.
- E. Provide recommendations for corrective actions.
- F. Implement temporary control measures to prevent any further injuries to employees.
- G. Indicate the need for additional or remedial safety training.

Accident investigation reports must be completed and submitted to the safety coordinator within 24 hours of the accident.

Accident Recordkeeping Procedures

The safety coordinator will control and maintain all employee accident and injury records. Records are maintained for a minimum of three (3) years and include:

- A. Accident investigation reports.
- B. Workers' compensation notice of injury reports.

To help identify injury trends, the safety coordinator will record employee injuries and illnesses on a log or tracking form such as the OSHA 300 Log of Work-Related Injuries and Illnesses. Trending will be used to identify and develop corrective actions that will prevent similar work-related injuries and illnesses from occurring.

15. SAFETY MEETINGS

Supervisors will conduct monthly safety meetings with their employees. The safety coordinator should provide supervisors with safety topics and discussion items each month. In addition to the safety topic, supervisors may discuss other items such as recent accidents and injuries, results of safety inspections, and revisions of safety policies and procedures.

Documentation will be maintained of each employee safety meeting. It should contain the subjects discussed as well as an attendance sheet.

Following the safety meeting, supervisors will observe employees performing job tasks associated with the safety topic item discussed in order to see whether or not they are following the safe procedures, they will be encouraged to continue to do so. Those found not following the procedure will receive correcting feedback.

When meetings are held periodically, there is always the danger that they will become dull and routine. We will continuously review and improve our meeting plans to prevent this from happening.

Supervisors will follow the below plan of action to ensure successful safety meetings are conducted:

Preparing for the Meeting

- A. Supervisors will conduct frequent inspections of the various areas and work practices and note any unsafe acts being performed or unsafe conditions that need to be corrected.
- B. Supervisors will select an unsafe act or condition to be used as a Safety Meeting topic for the benefit of all. A safety meeting can help identify and eliminate hazards before accidents occur.

Conduct the Meeting

- A. Supervisors will discuss only one topic per meeting.
- B. Allow employees to discuss why the situation occurs.
- C. Reach an agreement with employees on how to eliminate or control the situation.

Keep a Record of the Meeting

- A. Copies of the monthly safety meeting report forms will be sent to the Safety Coordinator. The supervisor should keep originals in his or her area.

16. SAFETY INSPECTIONS

Inspections provide an opportunity to survey the work place to detect potential hazards and correct them before an accident occurs. Typically, inspections are made to identify physical hazards at the worksite, however, the work practices of employees will also be observed during the inspections. Supervisors will observe employees to determine if they are performing their jobs in accordance with safe job procedures.

Continuous Monitoring

Safety is the responsibility of each and every employee. Continuous, informal inspections should be conducted by employees, supervisors, and maintenance personnel as part of their regular job responsibilities. These are the personnel who are most familiar with worksite operations and machinery. Our employees are a valuable source of information on work place hazards and we look to them for assistance in formulation practical workplace controls.

Supervisor must continually monitor their work areas. On a daily basis, they will check that:

- A. Employees are following safe work procedures.
- B. Machinery and tools are in good condition.
- C. Machine guards are in position.
- D. Material is stored properly.
- E. Aisles, walkways, and exit passageways are clear and accessible.

Periodic/Scheduled Safety Inspections

Periodic/scheduled inspections are formal, documented inspections that will be done on a regular basis at scheduled intervals. These inspections will be performed using prepared survey forms or checklists. Depending on the job tasks being performed and worksite conditions, they will be done weekly, monthly, quarterly, semi-annually, annually, or at other predetermined intervals.

FALL PROTECTION

All employees and visitors must be protected from fall hazards resulting from the construction process

All employees exposed to fall hazards must be protected from falls of 6 ft. or greater. This applies to all employees and excluded only when the employee has established that employees are inspecting investigating or assessing workplace conditions prior to the actual start of work or after the work has been completed.

Guardrails, nets, hole covers or personnel fall arrest equipment must be used to protect such fall exposure as:

1. Walking / working surfaces
2. Floor holes
3. Wall openings
4. Skylight openings
5. Work platforms / scaffolds
6. Steel erection

Anchorage points for fall protection must be able to support a 5000 lb per worker attached.

Improper anchorage points are:

1. Conduit
2. Guardrails
3. Plumbing
4. Roof stacks, vents
5. Light fixtures
6. Ladders and scaffolding

All employees exposed to potential fall hazards must receive training in hazard recognition, fall protection measures, safety policy, how to properly wear and use fall personal fall arrest equipment, and proper anchorage points.

Stairways, Handrails and Ladders

1. Whenever there is a break in elevation of 19 inches or more a stairway, ramp, ladder or other safe means of access must be provided.
2. All stairways with 4 or more steps or rising more than 30 inches must have at least one standard handrail from the bottom to the top of the stairway. Each unprotected side must have a stair rail.

3. Stairways landings with unprotected sides and edges must be protected with standard guardrails.
4. Job made ladders must be constructed for their intent use. Cleats must be inserted into side rails $\frac{1}{2}$ inch, or filled blocks used. Cleats must be uniformly spaced every 12 inches.
5. No damaged ladder may be used.
6. Metal ladders may not be used near electrical sources here contact could occur.
7. Single rail ladders are prohibited.
8. Portable ladders must be set up so that the base of the ladder is set out at a distance from the wall equal to $\frac{1}{4}$ the working length of the ladder.
9. All workers must maintain a 3 point contact on ladders at all time. At no time may employees carry tools or materials up ladders.
10. Ladders must be tied off at the top wherever possible. At a minimum, portable ladders must have feet to prevent slippage at the bottom.
11. When ladders are used or access to an upper elevation, the side rails must extend a least 36 inches above the landing.
12. Stepladders must be opened fully with side braces locked. Under no circumstance, may employees work above the second rung from the top of stepladders.

Floor Holes

1. All floor holes over 2 inches in diameter that pose a fall or tripping hazard must be protected with guardrails or floor hole covers.
2. Where floor hole covers are used they must be strong enough to support 2 times the intended load of workers, material, and or equipment.
3. Floor hole covers must be secured with nails or screws to prevent accidental displacement.
4. Floor hole covers must be either color coded or marked with the work **HOLE OR COVER** to provide warning of the hazard.
5. When the floor hole cover is not in place, the hole or skylight must be protected by a standard guardrail system.

ABC CONSTRUCTION INC.

DRUG FREE PROGRAM

AN OPEN LETTER TO THE EMPLOYEES OF

ABC CONSTRUCTION INC

(Company Name)

We have come to recognize that substance abuse is an on-the job problem, as well a social problem, for all of us. We believe abuse of alcohol and use of illegal drugs endangers the health and safety of the abusers and of others around them.

This company has committed to creating and maintaining a drug-free workplace without jeopardizing the job security of valued, but troubled, employees, provided they are prepared to help us help them.

Our policy now formally states that substance abuse will not be tolerated during working hours or on the company premises, including job sites. This prohibition includes the possession, use or sale of illegal drugs or alcohol.

Employees who are found to be under the influence of illegal drugs or alcohol or who violate this policy in other ways are subject to disciplinary action, which may include termination. Because of the serious nature of these violations, each individual case will be thoroughly investigated to determine the appropriate course of action.

It is important that all of us work together to deal with substance abuse and other personal problems to make a safer and even more rewarding place to work.

Sincerely,

Jorge Gonzalez
President
