

# Coral Gables Police Department

Report Date 6/1/2014  
Report Prepared by Sgt. K. Reinoso

## Response Time Report YTD 2014

Calls for Service are created in the OSSI CAD (Computer Aided Dispatch). For non-emergency calls, the CFS (Call for Service), is created in the CAD after a determination has been made that a police response will be necessary. In cases of a 911 call, the creation of a CFS is automated and is created immediately.

Response times are calculated from the moment the Call for Service is created to the moment the first police unit arrives at the location of incident.

Data does not include self-initiated incidents such as Traffic Stops and Area Checks. There is no response time associated with these incidents.

### City Wide Response

Priority Code	Number of Calls For Service	Response Time
P	926	4:07
1	1,617	7:55
