Development Project Overview with Site plan

Project Overview:

719 Biltmore Way Residences is a luxury residential development located on a prestigious and historic Biltmore Way Street in Coral Gables, Florida.

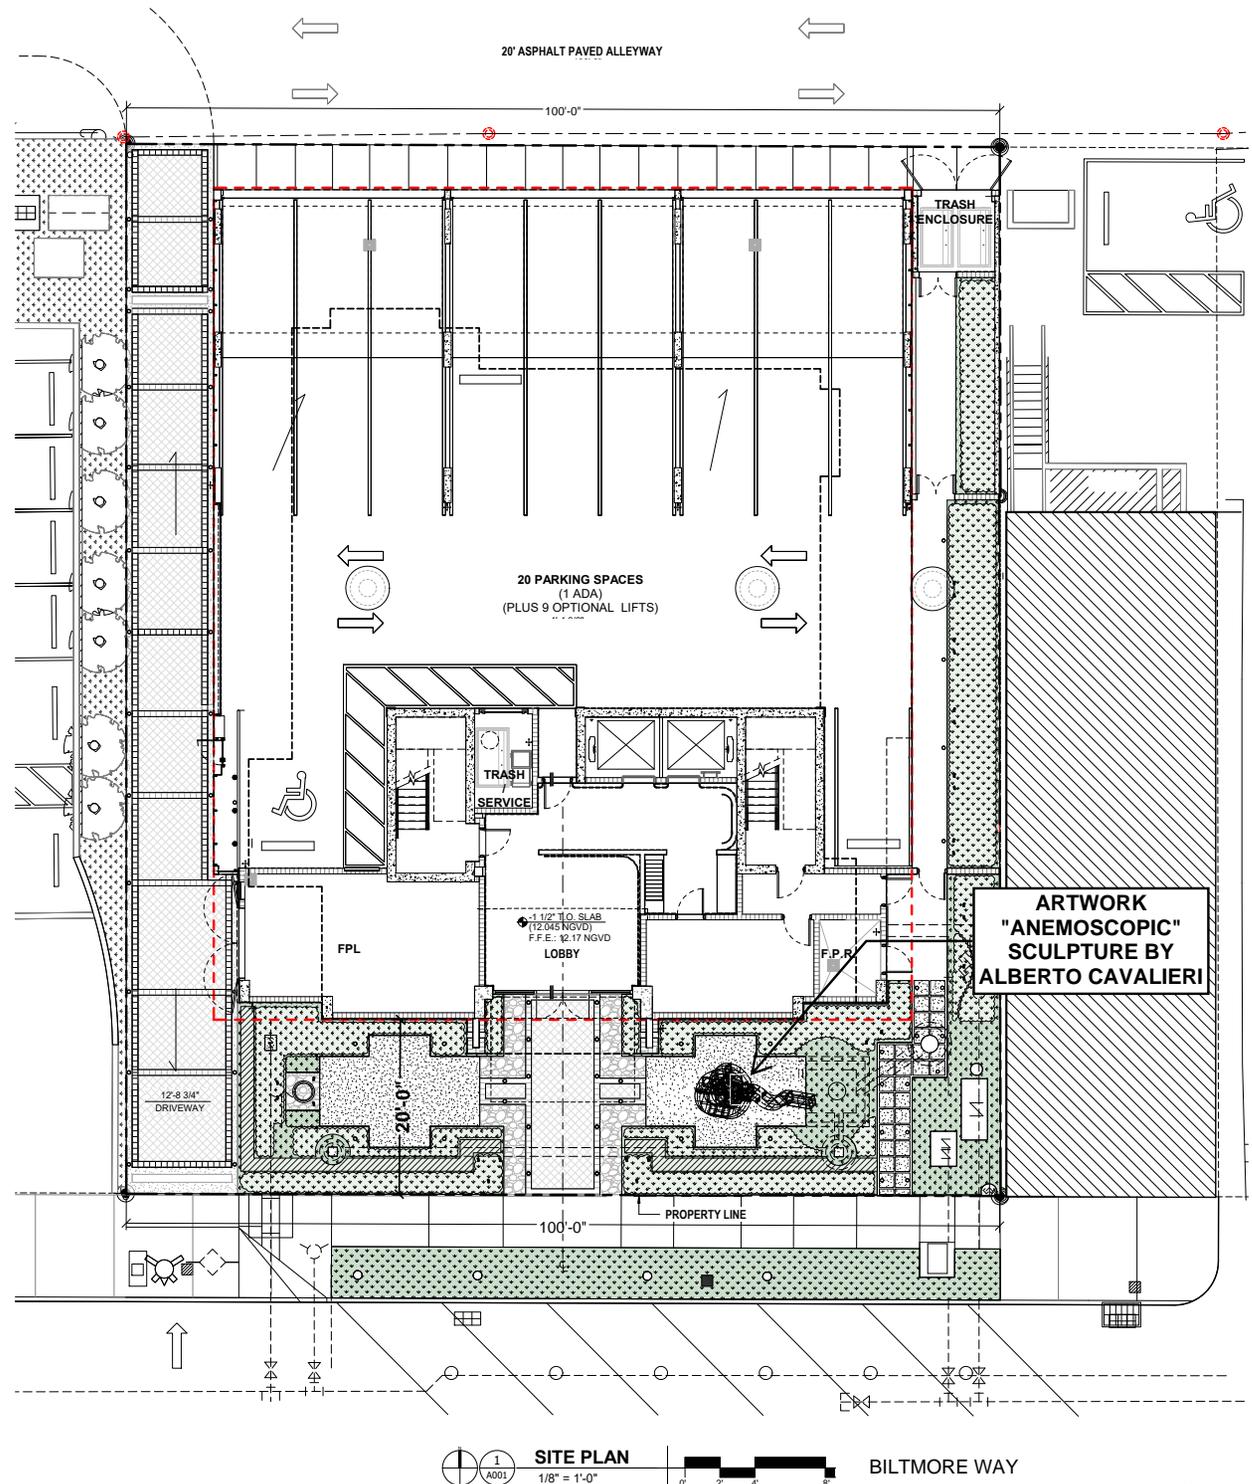

This exclusive project comprises nine full-floor, four-bedroom residences, each exceeding 3,500 square feet, within a 12-story boutique building.

Building Specifications:

- **Structure:** 12-story reinforced concrete construction with impact-resistant windows and sliding glass doors.
- **Residences:** Nine full-floor units, each with a private elevator foyer and dual elevators.
- **Ceiling Height:** 10' ceilings throughout.
- **Parking:** Gated, covered self-parking with two spaces per residence, with an option for a third vehicle lift.

Project Team:

- **Developer:** QRB 719 Biltmore, LLC
- **Architect:** Bermello Ajamil & Partners
- **Interior Design:** Sire Design

Artist Information

Alberto Cavalieri, born in Caracas in 1969, is a renowned Venezuelan visual artist specializing in monumental sculptures and architectural interventions. He completed his studies in industrial design, mechanical engineering, and fine arts, focusing on sculpture since 1994. Cavalieri's work is celebrated for its paradoxical exploration of form and matter, using materials like metal to create sinuous, organic shapes that seem to defy the rigidity of their composition.

Cavalieri's sculptures often feature complex knots and swirling forms, symbolizing various human activities and emotions. His approach combines high-tech processes with traditional steelwork techniques, allowing him to challenge physical laws and create visually striking pieces that appear to levitate and move organically.

His notable exhibitions include solo shows such as "Fragmented Knot" at Galería Art Nouveau in Florida and "Iron and Epiphanies" at Galería Freites in Caracas. His work is featured in numerous public and private collections, including the Museum of Latin American Art in California and the Museum of Contemporary Art in Caracas (Evan Lurie Gallery) (Marión Art Gallery) (Eternity Gallery) (OMSA Gallery).

Artwork Description

Title: **Anemoscopic**

Size: 183 in x 156 in x 71 in (Height x Width x Depth)

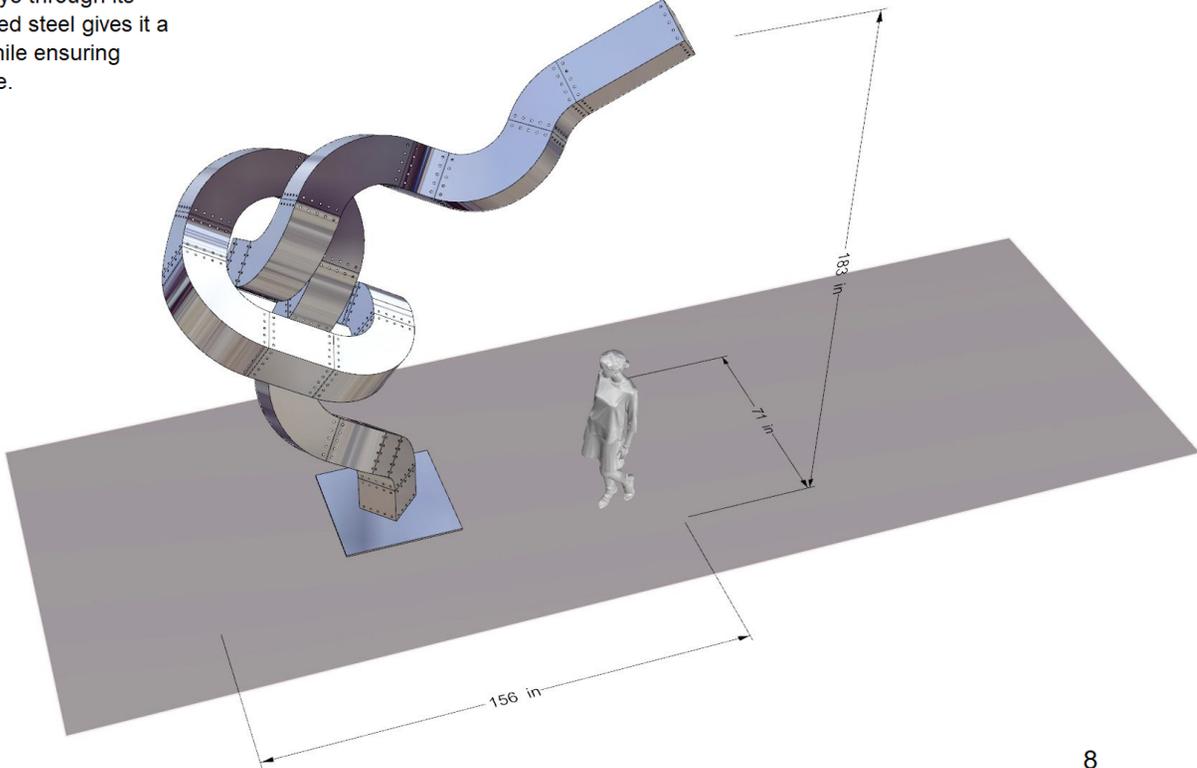

Material: Galvanized Steel

Description: Knotty steel bar sculpture and welded parts made by assembling modular.

Installation: Anchored to a concrete solid base.

Origin of the Piece: Direct from the Artist study.

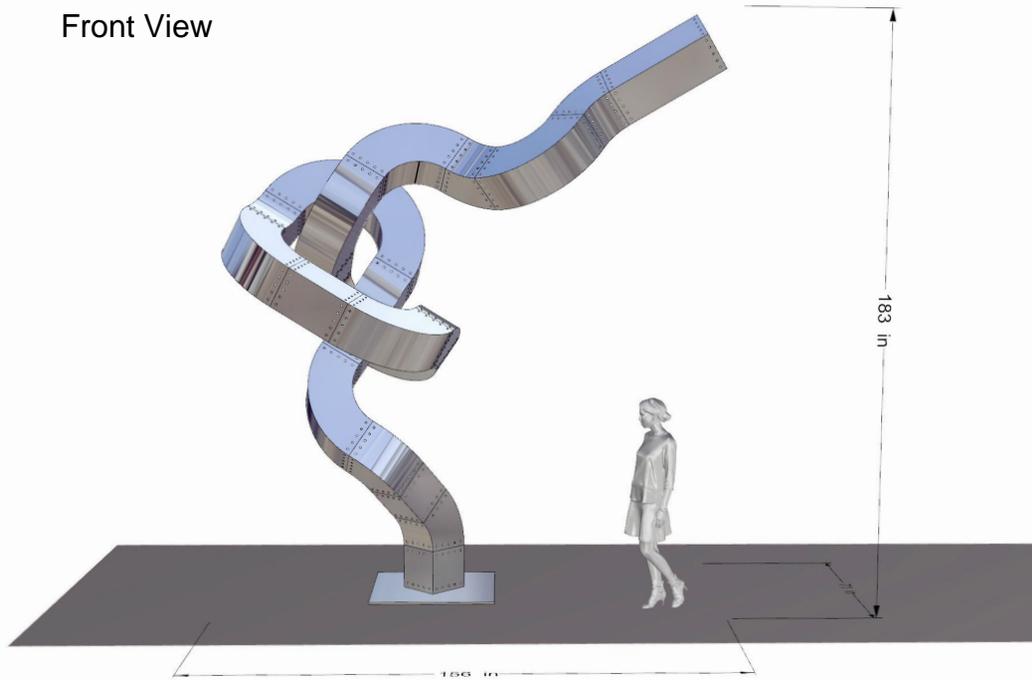

Contextual information: The design of the sculpture, with its flowing and intertwining ribbons, evokes a sense of movement and fluidity, drawing the viewer's eye through its complex form. The use of galvanized steel gives it a modern and industrial aesthetic while ensuring longevity and minimal maintenance.

Proposed Maintenance

Galvanized steel is a low maintenance material, however to maintain its appearance we recommend cleaning it one or two times a year.

Galvanized steel is designed to be corrosion-resistant, recommended maintenance will help extend the life of the art piece and keep it looking its best.
