RE: 700 BILTMORE WAY, CORAL GABLES, FL
Folio # 03-42270034-0001
Recertification of Building 40 Years or older

Gentlemen:

This Department has been advised that the subject building is forty (40) years old, or older, having been built in 1963.

In accordance with the Miami-Dade County Code, Chapter 8, Section 8-11(f), a Florida Registered Architect or Professional Engineer must inspect said building and a report must be furnished to this Department with ninety (90) days from the date of this letter, indicating that the building meets the requirements of building recertification under the Code. In the event that repairs or modifications are found to be necessary resulting from the recertification inspection, the owner shall have a total of 150 days from the date of this Notice in which to complete indicted repairs or modifications.

The architect or engineer that you choose to do the inspection may obtain the required forms: "*Minimum Inspection Procedural Guidelines for Building Recertification*," from this link: <http://www.miamidade.gov/building/form-checklist.asp> to access the interactive structural and electrical forms. In addition to the forms, a cover letter must state that that the property meets the requirement for building recertification; no additional documents or photographs are necessary.

The certification report, along with the filing fee in the amount of \$380.63; plus, \$2.45 per page document preservation fee must be paid with a check, or credit card payment to the "City of Coral Gables," and sent/delivered to:

**BUILDING RECERTIFICATION SECTION
Coral Gables Building & Zoning Department
405 Biltmore Way
Coral Gables, FL 33134**

Any questions may be directed to (305) 460-5228. Thank you for your prompt consideration.

Sincerely,

Manuel Z. Lopez

Re: Building Recertification
Building Address: 700 BILTMORE WAY
Folio # 03-4117-034-0001

Dear Property Owner:

In a certified letter dated 3/1/2013, this Department notified you that the property referenced above, required building recertification pursuant to Miami-Dade County Code, Chapter 8, and Section 8-11(f). The letter informed that it was necessary to furnish this Department a report prepared by a licensed architect or engineer within 90-days, that said building meets the requirement of building recertification provided under the Minimum Inspection Procedural Guidelines for Building Recertification.

Please be advised that as of 9/11/2013, this building is deemed to be in NON-COMPLIANCE in that the report is overdue; which further may result in the revocation of the Certificate of Occupancy, as well as being subject to other penalties as provided in the Code.

Failure to contact us before 11/11/2013 may result in our forwarding this building to the Miami-Dade County Unsafe Structures Board for further determination.

Please govern yourself accordingly.

Sincerely,

Manuel Z. Lopez

Re: Address: 700 BILTMORE WAY
Folio # 03-4117-034-0001

Dear Property Owner/Manager:

This Department has received the Building Recertification report that you submitted for the building certification for the above-captioned property; however, the report indicates that remedial repairs* must be done to the building in order for it to meet minimum requirements stipulated for safe occupancy as prescribed in Miami-Dade County Code, Section 8-11.

Pursuant to the Code you must complete the repairs within sixty (60) days from the date the report was submitted to this Department; and then, you must contact the original architect/engineer, so that a follow-up letter indicates that the building is now recommended for recertification.

If you should have any questions regarding the specific repairs identified in the report, please contact the original architect/engineer that prepared the report. If you have further questions, please contact us at (305) 460-5228.

Manuel Z. Lopez

Re: Building Recertification
700 BILTMORE WAY
Folio # 03-42270034-0001

Dear Property Owner:

In a certified letter dated 3/1/2013, this Department notified you the property referenced above requires a 40-year building recertification pursuant to Miami-Dade County Code, Chapter 8, Section 8-11(f). The letter informed you it was necessary to furnish this Department a report prepared by a licensed architect or engineer within 90-days specifying the building meets the requirements for building recertification provided under the Minimum Inspection Procedural Guidelines for Building Recertification.

Please be advised that as of 6/1/2015 the report will be overdue and this building will be deemed to be in NON-COMPLIANCE. This may result in the revocation of the Certificate of Occupancy, as well as, being subject to other penalties as provided in the Code.

Failure to contact us before 7/6/2015, will result in our forwarding this building information to the Miami-Dade County Unsafe Structures Board for further determination.

Please govern yourself accordingly.

Sincerely,

Manuel Z. Lopez

MINIMUM INSPECTION PROCEDURAL GUIDELINES FOR BUILDING'S STRUCTURAL RECERTIFICATION

1. DESCRIPTION OF STRUCTURE

- a. Name of Title: The David Williams Hotel Condominium Association Inc
- b. Street Address: 700 Biltmore Way, Suite 100, Coral Gables, Florida 33134
Legal Description: David Williams Hotel Condo Coral Gables Biltmore Sec PB 20-28 Lots 6 thru 22 Inc Blk 10.
- d. Owners Name: The David Williams Hotel Condominium Association Inc
- e. Owner's Mailing Address: 700 Biltmore Way, Suite 100, Coral Gables, Florida 33134
- f. Folio Number of Building: 03-4117-034-0001
- g. Building Code Occupancy Classification: Residential Group-R2
- h. Present Use: Residential, Condominium, Hotel.
- i. General Description, Type of Construction, Size, Number of Stories, and Special Features
The Building is 13 stories with a mechanical room and machine room above the penthouse level. The main building is a reinforced concrete frame that consists of a flat plate with a typical framing system at each floor except for the ground floor and the penthouse level. The basement and penthouse levels consist of a cast in place concrete beam, joist and slab framing. There is a basement level that has consistently been troubled by rising water; this basement level is used for parking and also contains various storage areas. The building exterior has some precast concrete non-structural features.

2. PRESENT CONDITION OF STRUCTURE

- a. General alignment (good, fair, poor, explain if significant)
- | | |
|----------------|-------------|
| 1. Bulging | <u>good</u> |
| 2. Settlement | <u>good</u> |
| 3. Deflections | <u>good</u> |
| 4. Expansion | <u>good</u> |
| 5. Contraction | <u>good</u> |
- b. Portion showing distress (Note, beams, columns, structural walls, floors, roofs, other)
There are a number of concrete beams and slab areas on the ground floor framing system that are in a deteriorated state and will need to be repaired following standard concrete repair procedures. Wall areas along the exterior of the parking level also exhibit spalling that should be repaired as part of this effort. The exterior balconies exhibit a number of spalled and cracked areas that will require repair. The exterior concrete panels that serve as balcony railings and the parapet along the roof perimeter contain spalled and cracked areas that are a hazard if they would detach from the concrete sections. These shall also be repaired as part of the repair project. Some areas showing distress were found at the Penthouse level, specifically along the canopy slab located along the north side of the building and at the exterior wall along the cabanas. We also found sporadic spalling of the precast panels that serve as balcony railings.
- c. Surface conditions – describe general conditions of finishes, noting cracking, spalling, peeling, signs of moisture penetration & stains.
Surface conditions were found to be in fair condition throughout the exterior. Stucco cracks were noted at some exterior masonry infill walls. Most of these can be sealed and addressed during a painting and waterproofing project. Masonry cracked areas were noted at the Penthouse and high roof areas of the mechanical room. **See Figure 2.**

Paul
11/01/13

d. Cracks – note location in significant members. Identify crack size as HAIRLINE if barely dissemble; FINE if less than 1 mm in width; MEDIUM if between 1 and 2 mm in width; WIDE if over 2 mm.
Cracks were found as per the description above.

e. General extent of deterioration – cracking or spalling of concrete or masonry; oxidation of metals; rot or borer attack in wood.
Some noted, limited to the areas indicated.

f. Previous patching or repairs Some previous patching noted in various areas of the building.

g. Nature of present loading indicate; residential, commercial, other estimate magnitude.
Foundation level: Parking and storage. Typical floor: residential. Roof level and penthouse: residential.

3. INSPECTIONS

a. Date of notice of required inspection: Not Available

b. Date(s) of actual inspection February 25-26, 2010

c. Name and qualification of individual submitting inspection report:
Paul Ingelmo, P.E.

d. Description of any laboratory or other formal testing, if required, rather than manual or visual procedures
None required

e. Structural repair note appropriate line:
1. None required
2. Required (describe and indicate acceptance): Existing deteriorated conditions noted above shall be repaired as a result of this inspection. Structural remediation throughout the building is required before Recertification of the building is conveyed.

4. SUPPORTING DATA

a. _____ sheet written data

b. Enclosed photographs

c. _____ drawings or sketches:

5. MASONRY BEARING WALL = Indicate good, fair, poor on appropriate lines:

a. Concrete masonry units Good condition

b. Clay tile or terra cotta units N/A

c. Reinforced concrete tile columns Good condition

d. Reinforced concrete tile beams Good condition

e. Lintel or beams Good condition

f. Other type bond beams _____

g. Masonry finishes - exterior

1. Stucco Fair condition

2. Veneer --

3. Paint only --

4. Other(describe) Precast concrete elements-Fair condition except for noted spalls.

h. Masonry finishes - interior

1. Vapor barrier _____

2. Furring and plaster Fair condition, some areas exhibit deterioration.

3. Paneling _____

4. Paint only Fair condition

5. Other (describe) Some areas of unfinished infill block: Fair

Handwritten signature and date: Nov 19/2013

- i. Cracks:
 - 1. Location - note beams, columns, other See above, at infill masonry.
 - 2. Description _____
- j. Spalling:
 - 1. Location - note beams, columns, other None noted.
 - 2. Description _____
- k. Rebar corrosion-check appropriate line:
 - 1. None visible _____ xx
 - 2. Minor-patching will suffice _____
 - 3. Significant-but patching will suffice _____
 - 4. Significant-structural repairs required _____
- l. Samples chipped out for examination in spall areas:
 - 1. No. _____ xx
 - 2. Yes - describe color texture, aggregate, general quality _____

6. FLOOR AND ROOF SYSTEM

- a. Roof:
 - 1. Describe (flat, slope, type roofing, type roof deck, condition).
Roof is sloped for storm drainage, slopes to internal drains; roof deck consists of a concrete slab at various locations of the building. High roof is built-up, modified bitumen with a mineral aggregate cap sheet and was installed within the last year, new flashing; all in very good condition. Lower level roofs including the entrance canopy are in poor condition and should be reroofed.
 - 2. Note water tanks, cooling towers, air conditioning equipment, signs, other heavy equipment and condition of support. There are three rooftop units located at the penthouse roof level. There were flashed as part of the recently re roofed areas. **See Figures 1 and 3.**
 - 3. Note types of drains and scupper and condition of cooling towers, air condition, etc:
There are internal drains throughout the roof areas that appear in good condition.
- b. Floor systems(s)
 - 1. Describe (type of system framing, material, spans, condition)
Concrete slab on grade in all areas of the building, office and warehouse.
- c. Inspection – note exposed areas available for inspection, and where it was found necessary to open ceilings, etc. for inspection of typical framing members.
Structural system throughout was visually exposed and there was access to all structural areas.

7. STEEL FRAMING SYSTEM

- a. Description: The main entrance canopy on the north side of the building is structural steel framework consisting of steel joists and beams. This area is concealed and we did not have visual access. No external deterioration was noted during our site visit.
- b. Exposed Steel - describe condition of paint & degree of corrosion:
None noted.
- c. Concrete or other fireproofing – note any cracking or spalling, and note where any covering was removed for inspection
none
- d. Elevator sheave beams & connections, and machine floor beams – note condition:
This was found to be in fair condition.

8. CONCRETE FRAMING SYSTEM

- a. Full description of structural system: The concrete framing system consists of reinforced concrete columns connecting a flat plate slab system located between the first and eleventh

floors. The Ground floor and penthouse level framing system consists of a pour in place beam and concrete joists framework. There are two stair enclosures at the west and east end of the building that we presumed are used as shear wall elements in addition to the central area elevator core.

Paul
10/14/2013

b. Cracking

- 1. Not significant xx
- 2. Location and description of members affected and type cracking- as noted above we found areas of deterioration in the concrete elements at the ground floor framing and sporadic conditions in various areas of the building. These included the exterior grade walls, balconies and precast concrete railings. See Figures 4, 5, 6, 7, 9 and 10.

c. General condition The condition of the main structural system is good.

d. Rebar corrosion - check appropriate line:

- 1. Non visible _____
- 2. Location and description of members affected and type cracking As noted above.
- 3. Significant but patching will suffice _____
- 4. Significant - structural repairs required (describe) _____

e. Samples chipped out in spall areas:

- 1. No. xx
- 2. Yes, describe color, texture, aggregate. general quality: _____

9. WINDOWS

a. Type (Wood, steel, aluminum, jalousie, single hung, double hung, casement, awning, pivoted, fixed, other) Existing windows are generally aluminum single hung. There are some lower pivoted windows in some of the apartments. The doors to the balconies are aluminum sliders. Most of the windows and doors are original. (non-impact) Some owners have accordion shutters in the balcony units. See Figure 8.

b. Anchorage – type & condition of fasteners and latches: anchorage to concrete masonry/concrete appears to be generally in good condition .

c. Sealants-type of condition of perimeter sealants and at mullions: Caulking all around appears to be in good condition.

d. Interiors seals – type & condition at operable vents: rubber seals in fair condition.

e. General condition: Fair condition overall.

10. WOOD FRAMING

a. Type – fully describe if mill construction, light construction, major spans, trusses; None noted.

b. Note metal fitting i.e., angles, plates, bolts, split plates, plates, other, and note condition: Not applicable.

c. Joints – note if well fitted and still closed: not applicable

d. Drainage – note accumulations of moisture: not applicable

e. Ventilation –note any concealed spaces not ventilated: not applicable

f. Note any concealed spaces opened for inspection: not applicable.

Re: Electrical repairs for 40 Year Recertification

Gentlemen:

We have performed an electrical inspection of the repair performed to date at your building.

Relighting of the parking garage is complete, Miscellaneous repairs called for in the 40 Year Recertification report have been performed. Penetrations through fire rated partitions have been performed. Corrections of deficiencies in the electrical room at the first floor are complete.

As far as can be determined, all electrical repair work at the Lobby Level and Garage Level have been completed satisfactorily.

Respectfully,
CURRIER ASSOCIATES

---	---

Re: The fourteen-story residential condominium buildings consisting of 196 units ("Structure"), built in 1963 (50-year recertification required), and located at **700 Biltmore Way**, Coral Gables, FL 33134-7428, legally described as Lots 6 thru 22, Block 10, of PLAT CORAL GABLES BILTMORE SECTION, according to the Plat thereof, as recorded in Plat Book 20, Page 28, of the Public Records of Miami-Dade County, Florida; and having folio number 03-4117-034-0001 ("Property").

The City of Coral Gables ("City") Building Official has inspected the records relating to the Structure in accordance with Article III, Chapter 105 of the City Code, pertaining to unsafe structures, and Section 8-11 of the Miami-Dade County Code, as applicable in the City, pertaining to existing buildings. The Structure is hereby declared unsafe by the Building Official and is presumed unsafe pursuant to Section 105-186(j)(13) of the City Code for failure to timely comply with the maintenance and recertification requirements of the Florida Building Code or Section 8-11 of the Miami-Dade County Code as follows:

On March 1, 2013, the City sent the Property Owner a 90-day Notice of Required Inspection requesting an inspection report conforming to the minimum inspection procedural guidelines as issued by the Miami-Dade County Board of Rules and Appeals, pursuant to Section 8-11(f) of the Miami-Dade County Code ("Report").

On September 11, 2013 and June 2, 2015, the City sent the Property Owner the City sent the Property Owner notices that the Report was past due.

The Report, submitted to the City on November 15, 2013, stated that the Structure did not meet the minimum requirements to be recertified as structurally and electrically safe. The Report noted that the following items required repair or modification: **Electrical:** 1) circuit breakers; 2) all branch circuits in all panels shall be identified and a typewritten pane directory provided at all panels; 3) all disconnected switches that are not clearly indicative of equipment protect shall be labeled as to use; 4) verify that all outlets on roof deck are ground fault protected; 5) pool deck ceiling lights, replace wiremold in dry locations only; 6) restaurant area to be inspected upon completion of work; and 7) replace 105 fluorescent fixtures at the basement parking area.

On November 18, 2013, the City notified the Owner that it must complete the repairs and submit a letter from the architect or engineer who prepared the Report stating that the Structure now meets the minimum requirements ("Compliance Report").

To date, the Owner has not a) completed the required repairs and b) submitted a letter from the architect or engineer who prepared the Report stating that the Structure now meets the minimum requirements ("Compliance Report")(collectively referred to as "Required Action").

Therefore, this matter is set for hearing before the City's Construction Regulation Board ("Board") in the Commission Chambers, City Hall, 405 Biltmore Way, Coral Gables, Florida 33134, on February 8, 2016, at 2:00 p.m.

You may appeal the decision of the Building Official to the Board by appearing at the hearing. You have the right to be represented by an attorney and may present and question witnesses and evidence, however, formal rules of evidence shall not apply. Failure to appear at the hearing will result in the matter being heard in your absence. Please be advised that, if someone other than an attorney will be attending the hearing on your behalf, he or she must provide a power of attorney from you at the time of the hearing. Requests for continuance must be made in writing to Belkys

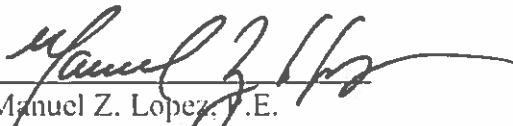

Garcia, Secretary to the Board, at City of Coral Gables, Development Services Department, 405 Biltmore Way, 3rd Floor, Coral Gables, FL 33134, bgarcia@coralgables.com, tel: (305) 460-5229.

If the Required Action is not completed before the above hearing date, the Building Official may order that the structure be vacated, boarded, secured, and posted to prevent further occupancy until the Required Action is completed. The Building Official may also order demolition of the Structure and recover the costs incurred against the Property and the Owner of record.

If the Property Owner or other interested party does not take all Required Action or appeal the decision of the Building Official, the Construction Regulation Board may enter an order of demolition and assess all costs of the proceedings and demolition and other Required Action for which the City shall have a lien against the Property and the Property Owner.

Please contact Virginia Goizueta, Building Services Coordinator, tel.: (305) 460-5250, email: vgoizueta@coralgables.com, or Manuel Z. Lopez, P.E., Building Official, tel.: (305) 460-5242, email: mlopez@coralgables.com. The Development Services Department's hours are Monday through Friday, 7:30 a.m. to 3:30 p.m.

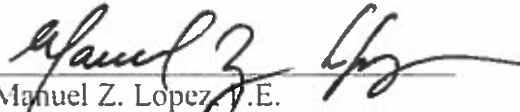

Please govern yourself accordingly.

Manuel Z. Lopez, P.E.
Building Official

CERTIFICATE OF SERVICE

I HEREBY CERTIFY that, on January 22, 2016, a true and correct copy of the foregoing notice was served via certified mail, return receipt requested, by first class mail, via e-mail at any e-mail address indicated above, and by hand-delivery or posting at the Property.

Manuel Z. Lopez, J.E.
Building Official

NOTICES

Any person who acts as a lobbyist pursuant to the City of Coral Gables Ordinance No. 2006-11, must register with the City Clerk, prior to engaging in lobbying activities before the city staff, boards, committees and or the City Commission. A copy of the Ordinance is available in the Office of the City Clerk, City Hall.

Pursuant to Section 286.0105, Florida Statutes, if a person decides to appeal any decision made by the Board, with respect to any matter considered at such hearing or meeting, he or she will need a record of the proceedings, and that, for such purpose, he or she may need to ensure that a verbatim record of the proceedings is made: which record includes the testimony and evidence upon which the appeal is to be based. Although a court reporter usually attends the hearing at the City's cost, the City is not required to provide a transcript of the hearing, which the Respondent may request at the Respondent's cost.

ADA Assistance: The City complies with the provisions of the American with Disabilities Act. Individuals with disabilities requiring special accommodations or assistance should contact Ernesto Pino, Assistant Public Works Director, at (305) 460-5004, with requests for auxiliary aids or services at least one business day before the hearing in order to request such assistance.

Dear Mr. Lopez:

We are in receipt of attached letter dated June 02, 2015.

City inspectors come here regularly once a month/ and or as agreed since inception of this project on January 05, 2015.

However, I have copied the Threshold Engineer (Special Inspector) registered with the City for this project, Mr. Roberto Hernandez from RH Engineering, whose office will supply the City with any report you may require.

Subject: RE: Recertification Report(s) DWHC

Importance: High

Good morning Mr. Lutz,

Our files indicate a recertification report was submitted to the City on 11/14/13 for the Structural and Electrical status of the structure as required by Miami-Dade County. The report concluded Electrical repairs where required in order to comply with the Recertification.

The report was accepted for processing but was rejected by the Building Official who required the Engineer Recertification Letter which is a part of the Recertification process.

In order to achieve compliance a new report (Structural & Electrical) must be submitted indicating there are no deficiencies and shall include a letter from the Engineer recommending the City issues the recertification.

At this time, the Building Official will not issue additional administrative extensions on this property therefore; the property will be scheduled for the February 2016 Construction Regulation Board meeting. Please note the Board will hear your case and provide you with a compliance schedule.

Thank you

Importance: High

Mrs. Goizueta:

Pardon the delay in answering, your mail was sitting in my spam box.

I believe there is some confusion over the recertification report(s). The reason for my e mail and our letter dated December 08, 2015 was to inform the building official of the progress made and to invite Mr. Lopez to see the progress first hand.

It was not designed to replace the approved format by Miami Dade, as we are close but have not yet reached the end of the project due to the circumstances described.

You had also sent us an attachment for the 40 electrical recertification, this work was completed and accepted by the City of CG on Nov 18, 2013 (see attached and below correspondence confirming acceptance) .

On behalf of the Board of Directors,

Mr. Lutz; thank you and the same to you and yours.
The Electrical Official accepted the electrical portion of that report on 11/18/2013. All that is now missing is the required repairs and the new report stating that the building is structurally sound.
As always please do not hesitate to contact me again if I can be of any further assistance, have a great day.

First of all, the best wishes for a healthy and prosperous 2014.

I know our 40 year recertification project engineer Roberto Hernandez visited you and City Hall in December and we are going to have our Pre-bid meeting with several contractors soon, this month.

I also wanted to get back to the Electrical Recertification, as you remember, I presented the attached to you in our meeting and we were wondering if the documentation suffices to satisfy the City's requirements.

If not, I will have to contact the electrical engineer Charles Currier again and ask him to provide the exact report that you require.

Please advise.

Thank you very much.

Subject: Recertification Report

Mr. Lutz,

The inspection results we have received from RH Engineering group dated October 21, 2015 cannot be accepted as the recertification report.

Please provide a report as per Miami-Dade County approved format, please see attached.

Chapter 4 General

4.6.12.4 Excerpt: Any device, equipment, system, condition, arrangement, level of protection...

Any device, equipment, system, condition, arrangement, level of protection, fire-resistive construction, or any other feature requiring periodic testing, inspection, or operation to ensure its maintenance shall be tested, inspected, or operated as specified elsewhere in this Code or as directed by the authority having jurisdiction.

Failure to repair or replace Diesel generator tank due to corrosion.

OK Violation cleared on 11/30/2015

NFPA 14 07
Floor 1

Sprinklers

4.8.2.1 FDC caps are in place.

Fire department connections shall be equipped with caps to protect the system from the entry of debris.

Failure to repair FDC caps on the east side of building and throughout building.

OK Violation cleared on 10/23/2015

Inspector Comments:

Inspector Comments - Reinspection #1: The fuel tank violation is still outstanding. This file will be forwarded to the enforcement division.

CITY'S
EXHIBIT

9

Failure to correct violations within 15 days of re-inspection is subject to penalties up to and including the issuance of Civil Citations in the amount of \$200 per violation / per day.

Failure to provide immediate corrective measures when required, may result in administrative action including but not limited to: mandatory fire watch, building evacuation, or stoppage of all work.

Per City Ordinance 30-4, a Fire Inspection Fee will be billed for this inspection. All fees are subject to change without prior notice.

Thank you for your assistance. If you have any additional questions or to schedule an inspection, please contact the inspector listed at the top of this report.
