7	we had commissioned when we got commissioned	7	The ground floor, again, if I may come back
8	for this project, it truly felt like a	8	to it, we have provided one main paseo,
9	designer's dream, in terms of having almost a	9	vehicular and pedestrian paseo, where we took
10	city block. So we wanted to really put out	10	advantage of it in minimizing the curb cuts,
11	something different. Instead of the zero	11	again improving the pedestrian realm, and from
12	setbacks, we went into expanded setbacks, we	12	that paseo, we actually have access to our
13	went to larger pedestrian realm, because the	13	loading, internalized loading, for our project
14	goal was truly, how can we improve this	14	and access to our internalized parking garage,
15	pedestrian realm and take it to the next level.	15	as well.
16	It's what we did and that's how we culminated	16	We also have a paseo on the west side,
17	it with a park, with the articulation of	17	which, again, with more setbacks than the Code
18	courtyards into the mass itself, to break it	18	required, and as you come up, the last thing we
19	down further, with larger expanded sidewalks	19	did to really articulate the massing and keep
20	for better trees, better canopies, and we, as a	20	it within the overall height is, we broke out
21	result of that, instead of a ten or twenty	21	the seventh floor and provided our pool deck
22	percent open area, we're just under thirty	22	level at that particular area. Centralized
23	percent.	23	with the overall project, we count with
24	And obviously the other goal was to	24	approximately 15,000 square feet of amenity
25	essentially provide, almost 90 percent of the	25	pool level area at that particular height.
