Definition

Urban Open Space: Urban Open Space is understood to mean those areas designated in the City which are between 0 and .25 acres and typically contain landscaped areas but have very limited or no facilities or other improvements. The recreational use of these sites is limited by their location and/or size. These sites serve to preserve the aesthetic quality of an area or to intersperse congested urban environments with aesthetically pleasing buffer areas. Some open space areas may serve as linear, vest pocket parks, while other areas are parkways, boulevard medians, plazas, malls, courthouse squares and promenades.
