Hi Lorena

I support the idea that any and every Coral Gables waterway owner has a right to access the waterway via a private dock. Relative to this particular situation I recommend the City of Coral Gables to survey the navigable waterway assuming the addition of the proposed dock to ensure that the new dock does not obstruct the waterway. If it doesn't, I vote in favor of the proposed variance.

The waterway is not uniform and the width opens and closes throughout. So it's important for the City to understand the width of this particular part of the waterway assuming the proposed dock gets built and a boat is placed in the space.

Kind regards

Manny

Good afternoon, Board members - just a reminder to share your comments regarding the referenced variance. I would like to forward everyone's comments by Friday, May 22nd.

Best regards,

**Lorena Garrido**
