PG

Structural • Paul Guth - Structural • Disapproved

1) Please indicate which wood members are to be replaced – decking, joists, or stringers. Is this a replacement of all dock framing members or just a partial replacement? 2) Please include existing drawing D-2 as part of the permit documents, as this sheet shows member connection requirements and material specifications. 3) The dock member sizes shown on sheet D-1 (2x8 joists, 2x12 stringers) do not appear to match the permitted drawings (3x8 joists, 3x12 stringers). If the proposed repair member sizes are to be different than what is shown on the permitted plans, then signed-and-sealed structural calculations are required to show that the proposed member sizes can adequately resist the required design loads.
