Yeah, thank 8 Now, that being said, I'm giving you the 9 9 gist of what the changes were, and that is that 10 10 MR. PARDO: So, the first thing, you know, we went back and we were able to implement a 11 11 I want to let you know is that the Committee lot of the original intent, a lot of the 12 12 was unique, because it was not a cross original intent of the original Mediterranean 13 reference of other professions. It was all 13 Ordinance. This all started back in the mid 14 14 architects, seasoned architects. So it was '80s, when we were doing a building on Ponce 15 15 good, because these are the people that and Almeria, and it ended up that we had to 16 actually use the Code, and put the things 16 tear it down, because of structural issues that 17 17 together, and then end up with the final it had. It was called the Old Lock (phonetic) 18 18 products. Showroom. Lock Showroom is historic, and that 19 So I think you have in your documents, from 19 was basically a heart attack for a lot of 20 what I saw online, I think you have the red 20 people in the community. 21 21 line comments, you have the strike-throughs --We were able to tear it down, come before 22 you have the strike-throughs of the original 22 the Commission, and get certain dispensation to 23 23 verbiage, and we ended up with the final draft, be able to build what is today on the corner of 24 that was given to us back on the 1st of 24 Ponce and Almeria, which used to be the Bank of 25 25 October, from the City Attorney's Office, from Coral Gables, which is today an Amtrust Page 19 Page 20 1 1 building. And that started the new transitional enough, not compatible enough to 2 2 Mediterranean revival in Commercial buildings surrounding areas and neighborhoods, just 3 3 in the City. This was in answer to some other complete -- some of them completely out of 4 4 of the designs that had gone up recently, from scale and don't provide certain things that 5 5 the mid '60s, to about that time, glass block should have been provided. 6 6 buildings, concrete ritualistic architecture, So one of the things that we did is that, 7 7 all permitted in the Commercial area. in the Code today, there's Section 5-02, which 8 8 delineates in two sections, A and B, delineates So, one of the things that was discussed, 9 9 was that there was a requirement for bonuses, certain factors that the Board of Architects 10 10 because of the cost of construction, of doing are responsible for reviewing all designs of 11 11 something that was much more elaborate than all construction here in the City. These are 12 12 some of the other projects that had really had great tools that exist there in that section. 13 13 to cut back a lot, and you see that in history, The funny thing is that, in the Coral Gables 14 14 you see it in the Art Deco area in South Beach, Mediterranean section, there's no reference to 15 15 and that was a direct response to the economy the 5-02 section that's been placed in there. 16 and certain other things. 16 The other thing is that the intent -- when 17 So, moving a little faster forward, those 17 you look at the markups, the intent and the 18 bonuses of additional FAR and other things were 18 purpose of this particular section are 19 implemented at that time to be able to off-set 19 delineated very, very clearly and have been 20 20 the cost to be able to provide a certain style brought back to the original intent. 21 of architecture in the Commercial areas. 21 Now, the reason I say that is, because what 22 22 So, now moving forward to some of the happens is that, we've had a few consultants 23 23 discontent, there are a couple of project that re-write the Code for us. This is the first 24 24 have been built on the Highway, on the Circle, time that we've got a group of just architects 25 that are just either too massive, not 25 re-writing the Code for you, at no charge. And

Page 21 Page 22 1 the point was that, because we use it, because 1 concentrate on this tonight. 2 we understand, and having seven of us, it's a 2 But on the PAD portion of it, it's very 3 3 lot more exact than possibly, you know, a important, because once you take properties, 4 4 consultant not understanding or just not like the size of a block, and you start to following through on the other part. So the 5 5 accumulate, and once you hit the magic 43,560 6 6 intent was clarified. square feet, which is one acre of land, you go 7 7 Then, very brief, and, again, that ship has into the PAD. Now, the PAD is very specific. 8 8 sailed, we clarified the purpose and What the PAD says is that, you're able now to 9 applicability. We also brought in a certain 9 use your design ingenuity, but you cannot stray 10 10 process, that doesn't exist -- and by the way, from the underlying Zoning Code. 11 11 if you're keeping score, Section 5-201A is So if that entire block has one Zoning, 12 12 where the clarity and purpose and ability is. that's great, but if it has multiple Zonings, 13 So it's broken down into two sections. One is 13 well, you have to be careful. Now, what the 14 14 the style of the architecture and then the PAD does say specifically is that you're able 15 15 other are the amenities, which are pedestrian to take density and move it around, but there 16 16 amenities, and applicability. are at least 20 different examples, where it 17 17 Then, on page -- Section 5-02, Page 5-02, says that the underlying Zoning governs. Now, 18 under Special Location Site Plans, that's where 18 there is a little bit of flexibility in there 19 you have Special Site Plans, such as PADs, 19 to be able to reward good design. So we addressed that in Page 5-02, which 20 Planned Area Development. And by the way, our 20 2.1 21 charge was to really concentrate just on Med this is the Special Location. We also added a 22 bonus, not to stray from there. Legal was very 22 step that did not exist. Right now, when you 23 23 specific, and that's what we were supposed to have a development, you go before the Board of 24 do. There are other issues in the Code, many 24 Architects for preliminary approval, and then 25 issues in the Code, but we're only going to 25 you go through final approval. What was Page 23 Page 24 1 happening, that we -- I personally interviewed 1 the design with the architect and its past employees that had to do with development 2 2 consulting engineers that have to provide all 3 3 and also volunteers that had served on the of this technical information, and that design 4 Board of Architects -- I mean, I sat on the 4 is already completely inflexible by the time 5 5 Board of Architects -- I chaired the Board of the Board of Architects sees it for the first 6 6 Architects. I sat on a bunch of boards, time, which is for the preliminary review. 7 7 including this Planning Board, that I chaired, The other thing that happened, and I'm sure 8 8 but the point was that it was important to Mr. Trias would disagree with me, is that many 9 9 understand that sometimes, by the time the times, during the presentation, when the Board 10 10 Board of Architects got a design, as I had said of Architects are reviewing plans, they were 11 several times, the souffles was already cooked. 11 sometimes told, no, you can't look at that, 12 12 You can't just add salt and pepper to the because that's Zoning, or you can't look at 13 13 souffle. You've got to do it while you're this, because it's Zoning, or you can't look at 14 14 still cooking. that, because it's Zoning. Zoning is Zoning, 15 So we came up with the concept of having a 15 and Legal is right, the Zoning is on the land 16 conceptual approval. Right now, if you have a 16 and that's what it says, and, period, end of 17 PAD, you have to go to the DRC first. Once you 17 story, but if you go to the design section of 18 go to the DRC, you have to prepare a lot of 18 5-02, where it tells you that you can opine on 19 technical documents, because it's more -- the 19 massing, on step backs, on proportions, on all 20 2.0 DRC, and in other municipalities are called a of these different things -- there are twenty 21 TAC, Technical Advisory Committee, and 21 items there -- and they're very clear, and 22 basically that's what the DRC is, a Technical 22 that's part of the pallet that the architect 23 23 Advisory Committee. They have fire, you have has to be able to review something and say, 24 building, you have Public Works, you have all 24 well, it's out of scale or not out of scale. 25 25 of these people. You spend a lot of money on Some buildings had the step backs in the

Page 25 Page 26 1 wrong proportions, et cetera, but then I was 1 that George Merrick, our founder, came up with, 2 2 told, by architects that have sat on the Board and they adopted it and said, "This has to be 3 3 of Architects recently, well, we were told we preserved." So both of these things have been 4 4 can't do or say anything about that. Now, at added in there, clearly, into this change, and 5 least that was the perception that they had. 5 it's very important. 6 6 So I'm not trying to cast any aspersions on any So one of the concerns, of course, was, 7 7 Staff member or any Board of Architects member, well, if you have compatibility with historic 8 8 buildings, you're going to be taking away or anyone at all, except the fact that that's 9 an important part of how we review it. So, 9 development rights from a developer. Not so. 10 10 therefore, this is an essential part that has The key is, sometimes that building just has to 11 11 have a better relationship with the proposed been added to the section, and I want you to 12 12 understand that there's a huge difference building, and that the Board of Architects can 13 between conceptual and preliminary and final, 13 do, but what we did, as a safeguard is, we 14 14 very, very different. threw Planning to review it, we threw Historic 15 15 The third thing, Page 5-02, we brought to review it, and then we threw the Board of 16 16 Historical more into proper context. Now, Architects to review it. So between the three 17 17 there were concepts that were brought in, such entities, you're probably going to have a 18 18 as the view shed concept, that were taken out, Historic building that now has been given the 19 because it was more about compatibility. And 19 proper respect that it should have, without 20 this has to do with buildings that are 20 taking property rights away from the developer. 21 2.1 considered historical, because they've been On the bonus standards, during the meeting 22 designated as historical. 22 for the update with the Commission, I had to 23 23 The second thing is that, originally, years ask the Commission a specific question, and 24 ago, a previous Commission adopted the City 24 that had to do with what the general 25 25 Plan, in other words, the shape of the plan understanding of why the bonuses were being Page 27 Page 28 1 1 awarded, and it was a very specific question, doesn't exist right now. So not to muddy the 2 2 because we had -- between the seven of us, we waters, this is what we're talking about today, 3 had a disagreement -- I can't tell you if it 3 Med Bonuses. 4 4 was the majority, I can't tell you if it was The other thing was that there was an issue 5 5 with the way that the tables had been set up the minority, but there was a disagreement, and 6 6 I have to respect that. We could respectfully over time and there had been many revisions 7 7 disagree, but at the end of the day, I over time of the Med Bonus Ordinance and many 8 8 understand, because we should be rewarding of the components that make up the Med Bonus 9 9 great architecture. Ordinance. So, one of the things is that, some 10 10 But, in this particular case, this is of the bonuses or some of the items in these 11 called the Coral Gables Mediterranean Bonuses, 11 tables were inconsequential, some of them just 12 12 Mediterranean Style Bonuses, so, therefore, I didn't belong there, not to have the importance 13 13 asked the Commission, point blank, at that that had to do with the bonus or even what they 14 14 meeting, and they unanimously said, call the Standards, which is Table 1. 15 15 So we consolidated the tables and we ended Mediterranean Bonuses for Mediterranean style 16 architecture. So that was the end of the 16 up with seven items per Table 2. So we have 17 17 Table 1, which is part of your -- to get the story. So that was incorporated on Page 565-02 18 and clarified that it was Coral Gables 18 first bonus, which is a .2 FAR and one floor of 19 19 height, then you must comply with the style and Mediterranean Style Development Bonuses. Now, 20 20 that doesn't mean that -- there are other everything that's on that Table 1. And, then, 21 styles, and many times you're talking about, in 21 to get to the next level, which is the 22 the Commercial Districts, that shouldn't be 22 Development Level 2 or bonuses, then you get an 23 23 award winning designs that we all can agree are additional .3, and then you also get an 24 24 magnificent. So I think that's a -- maybe additional floor, and if it's a high-rise, an 25 25 that's a thought, and a different chapter that additional two floors.

Page 29 Page 30 So that being said, we consolidated Table very, very difficult, as long as you meet the 2, which had the pedestrian amenities, and then urban context, then they can be issued there, we made them obligatory, but we left language but it's much tighter than it was before, there, "as determined by the Board of

Architects," because, for example, one of the things is underground parking. Not every project is going to have underground parking, but it's there, but if underground parking is not possible or they can provide parking

without having to go underground, therefore,
the Board of Architects can determine that
that's not necessary. But what we did is,

instead of saying, you know, four out of eight or six out of twelve, we say, you have to comply with all of them.

Then the third table, which gave tremendous amounts of — I wouldn't call it relief, but just basically gave all sorts of indifference to setbacks, all of that was taken out, and we rewrote that Table 3, which is properly called now Other Options, and we rewrote it in such a way that when you have, Number One, building setback reductions, depending on the type of lot that you have, sometimes being double

very, very difficult, as long as you meet the urban context, then they can be issued there, but it's much tighter than it was before, because before it was like, you could bring it down to zero, you could do it anywhere. I've seen buildings where the columns are into the sidewalk. And we took out certain things that had to do with the right-of-ways and hanging into the right-of-ways and doing all sorts of things that were encumbering the views for people, because they were encroaching into the right-of-ways.

Now, the second thing that was added into Other Options was something very unique, and that is that we added another .55-02 as long as you had the ability of reducing density.

That's never been done before. So, in other words, what we were doing is rewarding larger units in these buildings, as long as you met certain things. In other words, if you reduced the density by one-half, we'll give you more FAR, in order for you then to provide larger units. So by having larger units, you have less density.

Now, a question was asked during one of the

Page 31

public meetings about, "Well, what happens with the massing? The massing is going to be

frontage lots, sometimes being lots that are

greater, because these are larger units."

Think about it, the largest component of massing is parking. So if you have less units,

you have less parking. So, therefore, you have

less massing. So it's a real win-win

8 situation, because instead of going in, like in 9 the City of Miami, where they have micro units

of 400 square feet or workforce housing, as in

Miami Beach, you have less units and that provides the ability of someone that's

downsizing in the City to hit a hole in the market.

MR. TORRE: Mr. Pardo, can I interrupt you?
I'm sorry. And I'm sorry to interrupt you.
I'm thinking, you're going into the specifics

of the recommendations a little bit and so forth. I would like to see a little bit more

discussion on a higher end first, about
 understanding where this is needed, where the

faults are, the function of the Board, just so I can get a better grasp on all of that, before

you present the proposals.

MR. PARDO: Your interruption was perfect

Page 32

timing, because I just --

MR. TORRE: Okay. I just haven't gotten the whole ball of wax still in my head, where we are, where we're having a fault.

MR. PARDO: And the thing is, the reason is, the Chair asked for specifics, I gave him the specifics. Sorry to be longwinded. But the point is that, I got to the last table, which is Table 3, and the rest of it has to do, of course, with the characteristics of certain buildings, eight buildings. We just rewrote certain things.

There's just one more item that I just remembered right now, because these are the conceptual items that are superseding — and we did change word by word, which means all sorts of things when you change words a certain way — and that is two items. The first one is that one of the problems that we had with a specific project in the City of Coral Gables, what was approved by the Board of Architects and what was built were completely different, massively different, which caused all sorts of issues. And one of the things that we wrote in is that the City Architect will be responsible

The reason I think is important is, the next page is the copy of the Ordinance that was done in 2004. That's just the front page, so	2 3 4 5 6 7 8 9 10 11 12 13 14	part that the City Manager did not receive this part, that the Commission did not receive, and I don't think the City Attorney received it, but if you read that last sentence, under B, on the next to the last page, it says, "The allowable floors are subject to the subject property applicable CLUP map designation, and the height is regulated by the Zoning Code." Now, in my opinion in my opinion, although this was not done by Mr. Trias, this was done
2 3 4 5 6 7 8 9 10 11 12 13 14 15	the Commission, yes, sir, very specifically. Today is my wife's birthday, so it better be good. The reason I think is important is, the next page is the copy of the Ordinance that was done in 2004. That's just the front page, so you see what the reference is.	2 3 4 5 6 7 8 9 10 11 12 13 14 15	part that the City Manager did not receive this part, that the Commission did not receive, and I don't think the City Attorney received it, but if you read that last sentence, under B, on the next to the last page, it says, "The allowable floors are subject to the subject property applicable CLUP map designation, and the height is regulated by the Zoning Code." The Zoning Code, in all of these zonings, that are the lower tier Zonings, is 45 5-02 feet, and when you do the math you don't start with 50 feet, you start with 45 5-02 feet. Now, in my opinion in my opinion, although this was not done by Mr. Trias, this was done 17 years ago, this has to be corrected, and it

So I am sure that the City Attorney has their own opinion, but I'm telling you right now, the Comprehensive Land Use Plan is the limit and the Zoning Code is what you have to design by, and if you want to change the Zoning Code, you're allowed to, within the limit, and sometimes you want to change both, the Zoning Code and the Comprehensive Land Use Plan, and that's why you have Land Use attorneys.

Now, sometimes there have been issues, from a Growth Management Act standpoint, that all of a sudden you painted yourself into the corner, and, then, all of a sudden, you can't develop anymore. One of them, for example, is traffic. So what the County did to resolve the traffic issue many years ago, was that they said, everything that's within the Palmetto	5 6 7 8 9 10 11 12 13 14 15 16 17	approved by the State, and they were able to make a very good argument for it, so we wouldn't have to stop. CHAIRMAN AIZENSTAT: Thank you. MR. PARDO: Thank you. MR. BERMELLO: Mr. Chairman, Commissioner Withers, Members of the Board, Willy Bermello, address 718 Valencia Avenue. I'm one of the Blue Ribbon Committee members. And I ask this Board today to consider deferring this item,

Commission at a time certain that I'm sure the City Manager will inform you of, and I would recommend that to do justice to the work of six weeks, by five architects, the City Architect and the Members of the Board of Architecture, to try to do that in an hour or two, I think, will fall short. I would recommend that this Board join the City Commission Staff at that time certain, where we plan to go item by item, word by word, comma, period, punctuation marks, style, substance, all of the above, and the dia is that you get a consolidated amended from the City Staff. So there's been a lot of good work, and I board Members of that Committee, including my colleague, Mr. Behar, City Staff or the others, flat well, or the Commission has voted to have flat well, or the Committee — there's nothing that flat well, or the Committee — there's nothing that flat is being proposed that is illegal. So once you take it from the Zoning Code, you need to revise it in the Comp Plan. The Residential Infill Regulations will be affected by that, also, so that would have to be revised also in the Comp Plan. There's the FAR increase. Again, there's
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	there are some Zoning Code issues that, I think, are relevant, and one is that there's an open space reduction, a reduction, instead of making it bigger, for MF4. Then there's a requirement that all of the standards for Table 2 need to be met. Now, one of the standards is underground parking. Does that mean that every building now has to have underground parking? I don't know. I mean, and those are some of the issues that I think are unclear. Another issue is that the awnings are like arcades now. I don't know if that's a good solution for architecture. There's the setback reductions on Table 3, and then there's the additional FAR for .55-02 and, finally, Mr. Pardo discussed with me and the Committee that the 1986 manual was the best source of ideas. That is the only one of those topics that	5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	right now? MR. TRIAS: No. MR. BEHAR: Are you okay, Mr. Trias? MR. TRIAS: So, basically, what I'm saying is that the issue is, that if we want to talk about Mediterranean architecture, we probably should talk about that, and the only aspect of these Zoning proposals is that final line, which is the manual. Then there were some issues that dealt with the Comp Plan. There's the reduction of the 25 percent density, which is in the Comp Plan. So once you take it from the Zoning Code, you nee to revise it in the Comp Plan. The Residential Infill Regulations will be affected by that, also, so that would have to be revised also in the Comp Plan. There's the FAR increase. Again, there's some policy about open space that probably will also that the comp Plan will be affected.

Page 74 Page 73 1 1 use, "incentives," and so on, based on the buildings that have been criticized publicly by 2 changes. So these are some technical issues 2 multiple people, I think all of them would 3 3 that prevent taking everything that is included qualify under the changes that are being 4 4 in the proposal. proposed. 5 I don't want to go through the red line in 5 So I don't think the Zoning Code is the 6 6 great detail. As you said, we can do that issue. I don't think it is at all. I think 7 7 later in the Workshop. But as you can see, it's the way that it has been applied and the 8 8 there are multiple problems with the changes way that changes have been made through the 9 that deal with the internal consistency of the 9 process, and I can go into some detail, at some 10 10 Zoning Code and also the consistency with the other time, about how certain things changed in 11 11 Comp Plan. certain projects, but I will tell you that it 12 12 I think the biggest issue is that had nothing to do with the words of the Zoning 13 compliance, that before -- the existing 13 Code. It had to do with the way things were 14 14 compliance had to do with meeting six of the applied. 15 twelve characteristics of the table, for 15 Going through the details, again, we can do 16 16 example, for eight of the twelve, depending on that, if you'd like, later on, but as you can 17 17 your project. Now you have to meet all of see, there's lot of inconsistencies that create 18 18 them. I mean, that is one of the biggest technical challenges. Now, as far as the 19 changes that I think -- and that would appear 19 building heights, and this is something that I think is very clear, that memo that you got has 20 is consistent with the idea of having more 20 21 21 Mediterranean buildings, because, at the end of a table. That table is in the Zoning Code. It 22 the day, the question is, are the changes being 22 is in the Zoning Code. Now, it's using the 23 23 proposed going to result in buildings that are dimensions that are in the Comp Plan, because 24 more Mediterranean? I think that was the 24 it's consistent with the Comp Plan, but it's in 25 question that the Commission asked. And of the 25 our Zoning Code table that was adopted by a Page 75 Page 76 1 1 Commission 17 years ago, after 32 public the whole Ordinance was provided, that's the 2 2 signed Ordinance from 2004, and it's available, meetings, and -- Chip, I'm sure you were a part 3 3 of that -- and it has not been changed for 17 if you want to read the whole Ordinance, which 4 4 years. So if you want to recommend changing includes all of the information about the Med 5 5 it, you can. Certainly, the Commission could Bonus, and highlighted there is the fact that 6 6 adopt a different dimension, but that would be it's -- that's worth 50 and goes on in there. 7 7 a change. So the concerns are multiple, and this 8 8 Now, I included the whole history, since is -- I'm finishing my presentation here. You 9 9 1930, of the building heights, just for know, one of the issues that -- I don't 10 10 information, because if you look at, for understand very well the conceptual review, 11 example, in 1987, a story was 12 feet. Then 11 because it happens to be only on the Special 12 12 you look at 1999, it changed to 13 and a half. Area Plan, so does it apply only for those 13 Then you look at 2004, that's when that 50-foot 13 Special Area Planned projects? As written, 14 14 base was used for bonuses. The 45 5-02 feet that's really the limit of that. Now, we've 15 15 remains, if you don't get a bonus, but for the done conceptual reviews for Board of Architects 16 bonus -- for the application of the bonus 16 as recently as the last meeting, when they 17 process, that's what was adopted. So those are 17 looked at a proposed mobility hub. 18 facts, and it's not something that is open for 18 The Plaza, by the way, one of the projects 19 discussion. What's open for discussion is 19 that has been criticized multiple times, it did 20 20 whether or not the policy should change, and I go through a conceptual review by the Board of 21 believe that's what the Committee is still 21 Architects, at multiple meetings, multiple 22 debating, because I don't think there's 22 meetings, building by building. So I can't 23 23 agreement on that. imagine a more thorough process of review than 24 24 And we provided the complete Ordinance. that one. 25 25 Now, in the memo, there's only the chart, but So all of those things -- we can do a

Thank you for clarifying that. 20 Yes, Venny. 20 These things were there. They're there. 21 21 MR. TORRE: I want to bring something up If the Board of Architects isn't taking this 22 here, and make sure everybody understands this. 22 and using it appropriately, that's something we 23 23 So the ones that do not know this, the Code should be talking about, but I believe a lot of 24 currently has a specific section, Section 5-02 24 this stuff that we're going to be looking at 25 25 architecture, which dictates what the Board of already exists in here. Now, it is not being Page 83 Page 84 1 applied properly? Is it being missed? Is the 1 because I'm confused by this. 2 2 Planning & Zoning overriding, by way of bulk MR. TRIAS: Right. The reason why this is 3 and mass, approvals? Is the Commission making 3 important is because, when you get to the 77, 4 4 those changes, not the Board? Is the Board with Med Bonus Level 2, I believe, some 5 5 empowered enough to make those -applicants, sometimes, may have tried to do an 6 6 MR. TRIAS: That language has been in the extra story, but that's not what the Code says. 7 7 Zoning Code for decades, older than the And what happens is that we need to apply the 8 8 Code properly. That's my opinion. And to make language for the Med Bonus, which is from the 9 9 '80s originally, but I've seen even the a big deal about something that is clearly in 10 10 language, in the 1930s Zoning Code, talks about the Code is stopping us from doing a better job 11 11 with the implementation. harmony of the architecture, from the very 12 12 beginning. So there's no reason why we cannot MR. REVUELTA: So which parts of the Code 13 13 figure out a way to do it well. are in black and white specifics saying 45 5-02 14 MR. REVUELTA: I have one question. Page 101 Page 102 1 Commission changes Land Use or not, approves a 1 change of Site Specifics, a variety of changes 2 2 Zoning change or not, and those are the things that were approved by the Commission, in 3 3 that, really, in my view, affect the massing addition to Med Bonus. 4 4 So there's a -- the Code, people complain and affect the size of projects, more than the 5 role of the Board of Architects. 5 that sometimes when I speak I sound 6 6 MR. REVUELTA: Or the style. It's the complicated, it's not me, that's just the Code. 7 7 massing and the changes of Land Use that people The Code is like that. And the Code has been 8 8 get the four and the five story additionally, like that for a very long time. And we tried 9 because then you have a change of Zoning, and 9 to make it a little bit simpler. Certainly, in 10 10 all of a sudden you have something that nobody the last three years, with your help, we were 11 11 expected to have. And I agree, it's not the able to do a lot, but, you know, at the end of 12 12 style of architecture, sometimes the process of the day, it's what it is. 13 changing Zoning classifications --13 MR. BEHAR: So had that project been 120 14 14 feet, which is what's allowed in that area, MR. BEHAR: It's clear, look at the project 15 15 on the Highway, which is one of the most everybody would have a different opinion of 16 controversial today. Look at the style. But 16 that project. You know, that's the way I see 17 17 it all -- it got all of the Med Bonuses, but it, okay, because the massing would have been 18 18 when you look at the project, it really doesn't significantly less, 25 5-02 percent less. 19 comply, for a lot of the massing, a lot of the 19 MR. TRIAS: One last comment. In my view, 20 step backs, you know, and I think that's the 20 the changes that are being proposed, would not 21 2.1 problem, is that, you know, the process is not affect those projects. 22 being executed correctly, in my opinion. 22 MR. BEHAR: I agree. I agree. It would 23 23 MR. TRIAS: Those two projects, Paseo and affect more of the design to be more in that 24 Gables Station, because they have been public, 24 style than what it does. 25 25 CHAIRMAN AIZENSTAT: Ms. Miro. I'll mention them, change of Land Use, right, Page 103 Page 104 1 action on whether or not to change Land Use or 1 MS. MIRO: Yes, if I may. 2 2 Venny, I'm trying to understand, so I think Zoning, and that is the biggest change they do. 3 that maybe the question you're asking is, where 3 So your role is very important in this process, 4 4 along the way are these massive projects and we seem to be speaking as if the Board of 5 5 slipping through the cracks, right, and what's Architects is the only one, but your role is to 6 6 the answer to that? So I haven't heard a make that recommendation on the issues that, I 7 7 concrete answer. It's not the Board of think, make the biggest impact. 8 8 Architects or is it the Board of Architects? MR. BEHAR: But the compatibility issue is 9 9 Or where is it that we have to be more careful, one of concern, because if the underlying 10 10 because obviously these projects exist, so how Zoning allows -- and you mentioned the North 11 is it that this is happening? And I know 11 Ponce corridor, and you could do -- the 12 12 that's a question that so many people have underlying, you know, allows you to do "X." 13 13 asked, how did this come to be? So what is, Well, yeah, next to that property is a one 14 you know, our role here? How can we, as a 14 story building that's been there. Is it 15 15 Board, reconcile what, you know, Mr. Torre compatible to do a six-story next to one a 16 brought up? 16 story? Maybe not, but the property -- the 17 Yes, it's part of the Code. The Code 17 underlying Zoning allows it, permits them to do 18 allows it, but anybody who's not an architect, 18 19 just a plain resident, can see, well, this area 19 MR. TORRE: That's where the problem is. 20 20 is brown, and if you put this, what the Code MR. BEHAR: Well, but then what do you say, 21 allows, it's not compatible. So how do we 21 no, even though you're allowed to do it, you 22 reconcile that, and where, along the process, 22 cannot do it? 23 do we address that? 23 MR. WITHERS: I think that's where this 24 MR. TRIAS: You make recommendations to the 24 whole bonus issue started, is that people are 25 25 City Commission and the City Commission takes given the right to do certain things and why

	Page 105		Page 106
1	should they be given additional rights to do	1	MR. WITHERS: But at the end of the day
2	more than the Code says it is. You know, you	2	MR. BEHAR: Chip, I think you were in the

16	elements, Mediterranean design.	16	MR. TRIAS: I think we have a very good
17	MR. BEHAR: Very liberal.	17	process, and I want to really thank everybody,
18	MR. WITHERS: That was the argument.	18	all of the members of the Committee, because to
19	MR. BEHAR: I think that	19	be talking about these issues is very rare in
20	MR. WITHERS: It is pushing the envelope.	20	any city. I mean, we're talking about the
21	MR. BEHAR: Right. I think we reached a	21	quality of architecture. This doesn't happen
22	point where I think the deferral	22	anywhere. So we're very lucky to be doing
23	MR. TRIAS: This has been going on since	23	this. And we also have the opportunity,
24	1986, as you know, exactly the same discussion.	24	because we have a very good Code, to improve it
25	MR. BEHAR: I think it's time for	25	a little bit.

So we have 24 the automobile disappear. So, in the entire 4 4 flats, and we're proposing 45 5-02 feet on block, we only have six curb cuts. If we're to 5 5 Santander. compare it with any other block, we will find 6 6 Let's go back to the rooftop a minute. One that there's probably like thirteen or fourteen 7 7 of the aspects of the project that I think is or fifteen curb cuts, but, here, we simply --8 8 six curb cuts, three on each one of the most successful was our ability to provide more 9 9 open space than is required by Code. Between the lofts, we propose a pool Gables Elementary teaches us about the beauty 7 7 house and a pool, and so you see -- you see of proportions and the elegance of repetition. 8 8 Let's go on to the next one. This is a sort of the space between the two blocks of the 9 9 view, where we're standing in the garden court, lofts. 10 10 with the townhouse and the garden court on the Next. 11 11 And so, on Santander, we have three stories right-hand side, we have the arch on the left, 12 12 over the garage, and you can appreciate here and we're looking down the via, and the via was 13 the courtyard, the arch, which connects onto 13 inspired by Via Mizner and Via Parigi in Palm the garden court beyond, the gable and the 14 14 Beach. 15 15 arch. The three-story balconies are inspired So these are the elevations of the duplexes 16 16 on Segovia, and one thing that I think is by the Biltmore balconies, and at the base of 17 17 the building, below the three-story balconies, important to note is how we're -- the 18 18 we have what we have named the glorietas, and elevations, the street elevations, are not 19 I'll discuss that in a little more detail. 19 filled with garages, and so we -- that's 20 These were some of our inspirational 20 because we have been able to incorporate the 21 21 images. So we see the Biltmore with this car into the block through the drives and thus 22 three-story balcony. We see also the archway 22 free the pedestrian experience from all of the 23 23 and bridge of the Douglas Entrance, the gable garages. 24 at the Merrick House, and then, from the San 24 This is the elevation to Hernando, with the 25 25 Sebastian, we learned about loggias, colonnade, lofts, the pool -- loggia in the middle, and Page 123 Page 124 1 1 pool to the right of that, behind that The project proposes a -- so I want you to 2 2 appropriated wall. note these two photographs, which are basically 3 3 Here we're seeing the townhouses, and you Malaga and Santander, and so this is currently 4 4 can see sort of the void and the solid, the what happens with parking around that block, 5 5 void and the solid, the voids being these where you have the garden apartment buildings, 6 6 spaces that we're creating within the block. and then all of the parking happens in the 7 7 And here we can see the streetscape of swale, in the right-of-way, leading to 8 8 Santander Avenue. compaction of the root system of the mature 9 9 As a PDA designation, the Site Plan is able trees. 10 10 to provide a 37 percent ratio of landscape open The project proposes a 48-unit multi-family 11 11 space, exceeding the current minimum development consisting of a variety of housing 12 12 requirement of 20 percent. The PAD makes it types, the duplex, flats, lofts and townhouses, 13 13 possible to not only front the residences on at an accessible price point. The intention is 14 14 the public street and civic spaces, but more to incorporate universal design and wellness 15 15 importantly, it allows for the automobile to be principles to allow -- wellness principles to 16 segregated to the rear of the building. BEHAR: A better question, Chip, physically, what percentage of the site is taken by the buildings or the footprint? MR. WITHERS: Yeah. It wasn't in here. It wasn't in there. That's why I was trying to back into that. MR. GARCIA-SERRA: Right. I think, if you look at Page 6, though, the Staff recommendation, you're going to see the lot coverage that's listed there, how much is permitted for MF1, how much is permitted for MF3, and if you add those two number together, the total lot coverage that could be permitted is 73,860 and what we have proposed in lot coverage is 56,970. So we're under. MR. WITHERS: Okay. So how did you come up with the 73 then, the 9823 and the 64 — MR. GARCIA-SERRA: Correct.

I took away your 37,00 square feet of landscaping that you're giving, 37 percent, and I came up with 71,000 square foot residual left over area, and I want to find out, is that lot coverage or what makes up that 71,000? MS. DE LA GUARDIA: No, because there are certain things, like your driveways MR. WITHERS: Okay. MS. DE LA GUARDIA: Like our drives do not count toward they don't count toward open space. MR. WITHERS: Toward lot coverage. MS. DE LA GUARDIA: So what counts toward open space are the garden, the courtyard, the gardening courts, the via, which is pedestrian. Those count toward the open space. But drives, where cars can drive, don't count toward open space. MR. WITHERS: Okay.	2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	building — MR. 10	I tell you, I think this project is extremely	10	as Chip did, the Code does allow for it,
11	well planned. I think it's sensitive to all of	11	because it's not in a single-family residence.
12	the adjacent lots, Zonings, streets, and I	12	I feel the same as Robert, I think it takes the
13	think that it has done something yes, I do,	13	massing and it takes the vision of the
14	in fact, believe, that, you know, and I commend	14	neighbors, and it actually plays with the
15	you for creating a village. I think that I do	15	residential areas around.
16	like the fact that you have internalized cars.	16	I also think, if our fathers from back
17	You have done you know, created spaces that	17	when, or Merrick, or how many years back, would
18	are going to be great spaces, you know, with	18	be looking at this, I think there would be a
19	the exception of the via that you created going	19	time that there would be an evolution or it
20	from east to west. It doesn't go all of the	20	would evolve and you have to evolve to what is
