All City Division/Department comments that were provided have been addressed by the Applicant.

**4. FINDINGS OF FACT**

This section of the report presents City Staff’s evaluation of the Applications and Findings of Facts. The City’s responsibility is to review the Applications for consistency with the City’s Comprehensive Plan (CP) Goals, Objectives and Policies and compliance with the Zoning Code and City Code.

The Planning and Zoning Division has prepared a Preliminary Zoning Analysis of the site plan request in conjunction with the proposed new Zoning Code text amendments creating Site Specific Regulations for Tract E, Hammock Oaks Harbor, Section 2. Presently no provisions exist that govern improvements on

Tract E; the current Hammock Oaks Harbor, Section 2 Zoning Code provisions only govern construction of single family residences. The Applicant drafted the proposed provisions in consultation with City Staff and proffered more stringent regulations, or “Site Specific Regulations,” for a new Yacht Basin. The number of dock slips shall be 8. The Applicant’s proffered provisions are modeled after and are more restrictive than the City’s current Zoning Code provisions governing yacht facilities.

In summary, the new provisions provides for the following:

- 8 dock slips pursuant to Section 5-2501 that is available for property owners and residents in the community only
- Prohibited uses such as no parking on swale or right of way; no food preparation on site; no mooring of commercial vessels; no charter boats and other commercial operations; no overnight stays; no rental or leasing of spaces; no commercial storage of fuel; no truck delivery of fuel; no retail sales; professional offices or boat repair facilities; no discharge of sewage from any boat located in basin
- A minimum of 3 foot landscape buffer Marin Street and the boundary of the property to the north
- Two (2) parking spaces for cars and eight (8) parking spaces for golf cars
- Walls and gates with a maximum 4- feet in height
- Secured preliminary site plan approval from DERM Coastal Resources Section on September 12, 2016
- Defined dock as “that portion of a pier where boat is moored for berthing, embarking or disembarking”

Zoning Code Section 3-1405, “Standards for review of text amendments to these regulations and for City-initiated district boundary changes” requires that the Planning and Zoning Board shall recommend approval of Zoning Code text amendments if the amendments satisfy the below standards. Staff evaluation of each standard is provided below.

A. *“Promotes the public health, safety, and welfare.”*

*Staff comments:* The Applicant has proffered Site Specific Standards that are more restrictive than current Zoning Code provisions governing boating facilities. Proposed prohibited uses and operations limit uses maintaining the welfare, safety of the proposed docks

B. *“Does not permit uses the Comprehensive Plan prohibits in the area affected by the district boundary change or text amendment.”*

*Staff comments:* The use of the property as a private yacht basin containing 8 dock slips is allowed under conditional use approval by Zoning Code in Single Family Residential Districts and Comprehensive Plan.

C. *“Does not allow densities or intensities in excess of the densities and intensities which are permitted by the future land use categories of the affected property.”*

*Staff comments:* The Applicant’s proffered restrictions to the use and clearly stipulated prohibited activities of boat slips provide the City and neighborhood patrol significantly more opportunities to enforce daily operation of the facility. The Applicant has also proffered to mitigate any potential impacts related to the height of the wall and providing vegetative buffer in landscape design.

D. *“Will not cause a decline in the level of service for public infrastructure which is the subject of a concurrency requirement to a level of service which is less than minimum requirements of the Comprehensive Plan.”*

*Staff comments:* The Application shall have no substantial impact on public infrastructure.

D. *“Does not directly conflict with an objective or policy of the Comprehensive Plan.”*

*Staff comments:* Based on the proffered operation limitations of the private yacht basin, restrictions, and the statement that boat slips shall be only for Hammock Oak Harbor property owners or residents, Staff finds the Application does not conflict with the Comprehensive Plan which is provided below.

## **STATEMENT OF USE**

The property owner wants to develop a private yacht basin with 8 slips on a portion of Tract E, Hammock Oaks Harbor, Section Two. The property is a long narrow strip that is located at the southern boundary of Lake B. The 8 slips are only for the use of the property owner and other property owners in the Hammock Oaks Harbor Subdivisions.

The site specific text amendment will provide restrictions to ensure safety and consideration of neighbors. To avoid owners of the slips from parking at the street or swale, 2 full sized parking spaces and 8 golf cart spaces area provided inside the gated area. Garbage and recycling bins are provided.

## **Zoning Code Text Amendment Justification**

The applicant is proposing a site specific text amendment for the proposed private boat basin on a portion of Tract E, Hammock Oaks Harbor, Section 2.

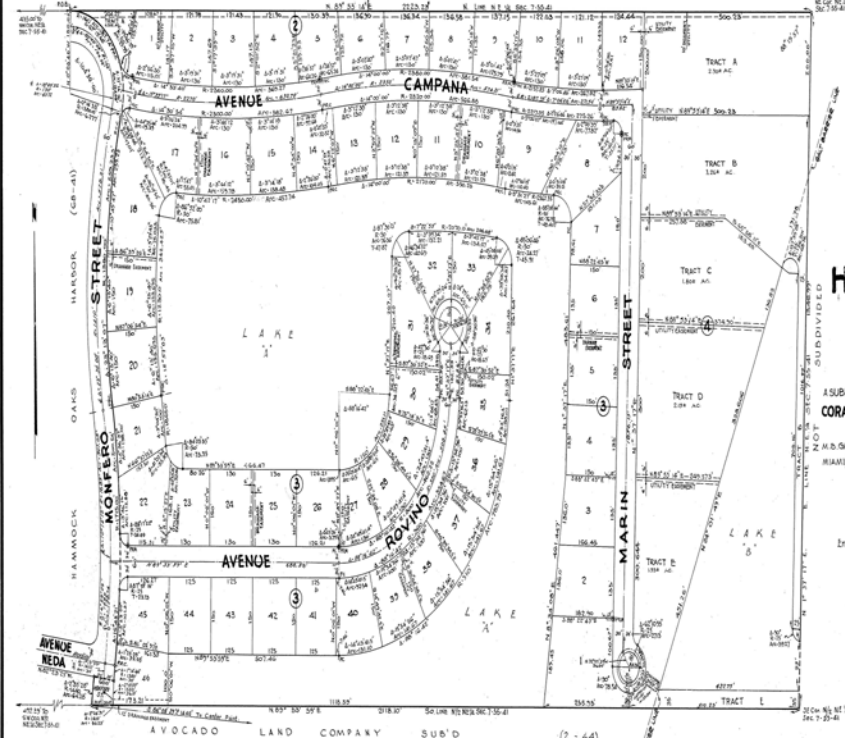

The text amendment addresses the total number of slips, spells out prohibited uses and provides consistency with other dock facilities in the City. In addition, the site specific text amendment sets forth an ownership and use restriction to property owners or residents in Hammock Oaks Harbor Subdivision. It also establishes the outward locations for the docks from the lake bank to protect existing mangroves.

The site plan of the facility, included in the application documentation, is noted in the text amendment and will be on record in the Planning and Zoning Department for future reference.

Comment No.	Type	COMMENT
1	General	Discrepancies between the Engineering plans approved by DERM and Architectural plans must be reconciled. DERM approved plans call for a 5-ft wide crushed limestone or shell path with steps into dock. Architectural plans call for a 9-ft wide paver path and show no steps.
2	General	The Engineering plans as currently designed include no ADA access to docks.
3	General	Provide cross sections for the proposed path every 20-ft. This will require additional survey elevations along the upland areas and the southern bank. Make sure to include a baseline and stationing.
4	A-1	Provide details for the base supporting the paver path. The portion of the path abutting the two proposed parking spaces shall support vehicular loads.
5	A-1	Trash and recycle bins adjacent to the MHW bank, as well as portions of the path will likely be partially underwater during high tides in the fall. The yearly fall king tides recorded at NOAA's Virginia Key station over the last 12 years vary between elevation 2.98' and 3.82' NGVD. Higher elevations have been recorded during storm events. MHW elevation as per sheet 7 of 7 in the Engineering plans is 1.6' NGVD.
6	A-4	Provide grading plan for entrance area and areas adjacent to parking areas for both vehicles and golf carts.
7	L-1.0	Provide details for installation of retention curb to contain fill.
8	7of 7	Engineering cross section calls for a dock at elevation 4.5' NGVD with two steps to a pedestrian path. Provide steps height. Typical step elevations vary between 3-in to 7-in. Thus, the proposed path is proposed to be installed between elevations 3.84' and 3.34' NGVD, placing the path at risk of being washed out during the fall high tides. (see comment 5 above).
