

Ian McKeown  
University of Miami, Sustainability Coordinator  
1516 Garcia Avenue  
Coral Gables Fl 33146  
305-439-4377 (c)

Ian has been the University's Sustainability Coordinator since August of 2008. Ian earned a B.A Degree in Ecosystem Science and Policy with a double major in Economics and a Minor in Meteorology from the University of Miami, along with an MS degree in Management of Technology within the Industrial Engineering School of UM in which he combined MBA training and engineering courses. During his undergraduate career, Ian was heavily involved in environmental student organizations, the honor council and preformed an internship for the Green U program. As the head of the sustainability program, Ian is in charge of reducing the carbon footprint for the University of Miami, from recycling, energy initiatives, community outreach, and education. Ian is currently working on innovative ways to uphold the commitments made by the University through the President's Climate Commitment and the Talloires agreement. Ian has a passion for the environment, sports, and in particular, outdoor activity.
