The electrical contractor (Technology Partners Group LLC) could have done the high and the low voltage under the same permit.

Hello Gerry,

Please verify that this property received an inspection for the low voltage/ and for what?
This is a code board case of mine for exp permit for the gate/ and electrical for the opener.
The building permit is still open and there is an electrical permit still pending all in Eden.
In Energov there is a low voltage electrical....?

Thank you,
