

City of Coral Gables
CITY COMMISSION MEETING
May 5, 2026

ITEM TITLE:

A Resolution of the City Commission of the City of Coral Gables, Florida, directing city staff to review, develop, and implement a process for the installation of rumble strips, tactile edge treatments, or other appropriate protective safety measures along the edges of existing and future bicycle lanes within the city, where feasible and consistent with applicable engineering, safety, and regulatory standards, in order to provide additional protection for cyclists; and providing for an effective date.

BRIEF HISTORY:

The City of Coral Gables is committed to promoting safe, accessible, and multimodal transportation options for residents, visitors, pedestrians, cyclists, and motorists.

Rumble strips, tactile edge treatments, and other traffic-calming or lane-separation improvements may provide additional visual, physical, or audible cues to motorists and cyclists, thereby helping reduce vehicle encroachment into bicycle lanes.

Any installation of rumble strips or similar treatments must be carefully evaluated to ensure that such measures improve safety, do not create unintended hazards for cyclists, and comply with applicable engineering standards, roadway design requirements, accessibility requirements, and any applicable county, state, or federal regulations.
