

Petition: Conversion to Miami Dade County Sewer System

As a Coral Gables resident, taxpayer and voter in Kings Bay I oppose any "special assessments" or "financing" of thousands of dollars through "increased costs" and "increased taxes" on my property for conversion and construction to the public sewer that a public works grant may not cover in full.

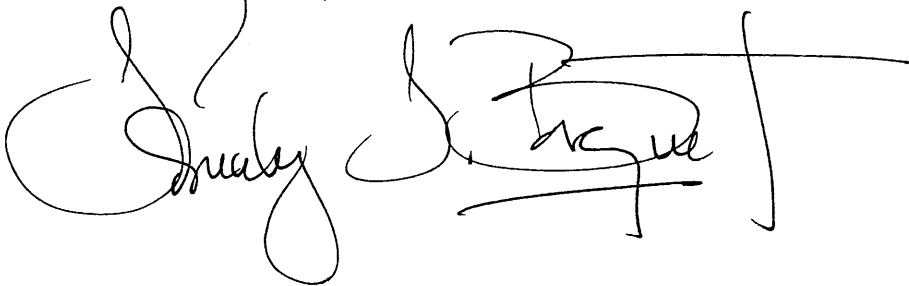

I'm also opposed to conversion to an existing, documented broken, leaking Miami-Dade County sewer system in need of billions of dollars in repairs and funding, that additionally could make me responsible for an exponentially costly "new sewer bill" and "costly new taxes" to my property.

As a Coral Gables resident, taxpayer and voter in Kings Bay I oppose any "special assessments" or "financing" of thousands of dollars through "increased costs" and "increased taxes" on my property for conversion and construction to the public sewer that a public works grant may not cover in full.

I'm also opposed to conversion to an existing, documented broken, leaking Miami-Dade County sewer system in need of billions of dollars in repairs and funding, that could additionally exponentially assign a costly "new sewer bill" and costly "new taxes" to my property.

While I recognize the potential health, safety and ecological impact of existing septic tank systems, and I support the general concept of a transition from individual septic systems to a central sewer system, I strongly object to any action starting on such a project without going through due process; financial, environmental, social and engineering impact, et al.

Therefore, I strongly oppose conversion, or preliminary actions leading to conversion, at this time.

Petition: Conversion to Miami Dade County Sewer System

As a Coral Gables resident, taxpayer and voter in Kings Bay I oppose any "special assessments" or "financing" of thousands of dollars through "increased costs" and "increased taxes" on my property for conversion and construction to the public sewer that a public works grant may not cover in full.

I'm also opposed to conversion to an existing, documented broken, leaking Miami-Dade County sewer system in need of billions of dollars in repairs and funding, that additionally could make me responsible for an exponentially costly "new sewer bill" and costly "new taxes" to my property.
