Not sure if a picture was uploaded.

Please All be advised.

My opinion on these 3 Black olive trees (#s 1-3) at this site pose an elevated risk of failure.

I have requested them be declared "Effectively destroyed".

I await any word to act accordingly with my findings.

Either city remove and back charge or resident to remove. All Violations etc to Homeowner.

To possibly answer:

Yes

We (City/ Vendor) did the minimum to **somewhat reduce risk of whole tree failure** due to excessive root destruction of 3 trees directly on this sites ROW.

Focus was on tree #3 that we had pictures showing stump grinder having removed all visible roots. Below for reference.

A fourth tree #4 in green to north PL can be retained and monitored.

**Thanks and Regards,**

**Subject:** 4107 Santa Maria st.

Good afternoon,

Charles and Victor, could you please evaluate the pruning of this City tree ? Also this property is the one that I stopped the work last week. Charles I know the city vendor has been working on city trees in that area, could you please confirm if they did it?

Regards.
