Market Area Comments: The subject property is located in a well established neighborhood primarily made up of small to medium size, Mediterranean (Old Spanish) styled, single family homes. The area was first heavily developed in the 1920s and a second phase of heavy development occurred in the 1950s. Trend in the area is the complete renovation rehabilitation of older homes or the demolition of smaller and dilapidated residences to make way for new, larger, custom built homes. Coral Gables is noted for its diverse architecture, tree lined streets, good public amenities and strict building code. It is considered to be one of the most prestigious and desirable residential communities in South Florida. Schools, shopping facilities and major traffic arteries are located in good proximity. Le Jeune Road (SW 42nd Avenue) to the east and Coral Way to the north provide access to all amenities. The downtown and commercial center of Coral Gables located on and around Miracle Mile is a short drive by car from the subject property. There are commercial properties along Tamiami Trail and Red Road but they do not adversely affect the subject property. Marketing time for reasonably and appropriately priced residences is expected to be three to six months.

STATEMENT OF ASSUMPTIONS & LIMITING CONDITIONS

— The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it. The appraiser assumes that the title is good and marketable and, therefore, will not render any opinions about the title. The property is appraised on the basis of it being under responsible ownership.

— The appraiser may have provided a plat and/or parcel map in the appraisal report to assist the reader in visualizing the lot size, shape, and/or orientation. The appraiser has not made a survey of the subject property.

— If so indicated, the appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in the appraisal report whether the subject site is located in an identified Special Flood Hazard Area. Because the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.

— The appraiser will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand.

— The appraiser has noted in the appraisal report any adverse conditions (including, but not limited to, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property, or that he or she became aware of during the normal research involved in performing the appraisal. Unless otherwise stated in the appraisal report, the appraiser has no knowledge of any hidden or unapparent conditions of the property, or adverse environmental conditions (including, but not limited to, the presence of hazardous wastes, toxic substances, etc.) that would make the property more or less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied, regarding the condition of the property. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, the appraisal report must not be considered as an environmental assessment of the property.

— The appraiser obtained the information, estimates, and opinions that were expressed in the appraisal report from sources that he or she considers to be reliable and believes them to be true and correct. The appraiser does not assume responsibility for the accuracy of such items that were furnished by other parties.

— The appraiser will not disclose the contents of the appraisal report except as provided for in the Uniform Standards of Professional Appraisal Practice, and any applicable federal, state or local laws.

— An appraiser's client is the party (or parties) who engage an appraiser in a specific assignment. Any other party acquiring this report from the client does not become a party to the appraiser-client relationship. Any persons receiving this appraisal report because of disclosure requirements applicable to the appraiser's client do not become intended users of this report unless specifically identified by the client at the time of the assignment.

— The appraiser's written consent and approval must be obtained before this appraisal report can be conveyed by anyone to the public, through advertising, public relations, news, sales, or by means of any other media, or by its inclusion in a private or public database. Possession of this report or any copy thereof does not carry with it the right of publication.

— Forecasts of effective demand for the highest and best use or the best fitting and most appropriate use were based on the best available data concerning the market and are subject to conditions of economic uncertainty about the future.

The Scope of Work is the type and extent of research and analyses performed in an appraisal assignment that is required to produce credible assignment results, given the nature of the appraisal problem, the specific requirements of the intended user(s) and the intended use of the appraisal report. Reliance upon this report, regardless of how acquired, by any party or for any use, other than those specified in this report by the Appraiser, is prohibited. The Opinion of Value that is the conclusion of this report is credible only within the context of the Scope of Work, Effective Date, the Date of Report, the Intended User(s), the Intended Use, the stated Assumptions and Limiting Conditions, any Hypothetical Conditions and/or Extraordinary Assumptions, and the Type of Value, as defined herein. The appraiser, appraisal firm, and related parties assume no obligation, liability, or accountability, and will not be responsible for any unauthorized use of this report or its conclusions.

DEFINITION OF MARKET VALUE *:

Market value means the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

1. Buyer and seller are typically motivated;
2. Both parties are well informed or well advised and acting in what they consider their own best interests;
3. A reasonable time is allowed for exposure in the open market;
4. Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
5. The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

* This definition is from regulations published by federal regulatory agencies pursuant to Title XI of the Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA) of 1989 between July 5, 1990, and August 24, 1990, by the Federal Reserve System (FRS), National Credit Union Administration (NCUA), Federal Deposit Insurance Corporation (FDIC), the Office of Thrift Supervision (OTS), and the Office of Comptroller of the Currency (OCC). This definition is also referenced in regulations jointly published by the OCC, OTS, FRS, and FDIC on June 7, 1994, and in the Interagency Appraisal and Evaluation Guidelines, dated October 27, 1994.

GP Land : Site Description - Site Comments

The subject property is a 13,464 square foot vacant lot. It is currently listed on the Multiple Listing Service (MLS#A2202851) for \$1,100,000, or \$81.70 per square foot, and has been on the market since November 12, 2015 with no price revisions since then. The subject site is a rectangular corner parcel with 102' of frontage along Catalonia Avenue and 132' of frontage along Anderson Road; both residential roads

The appraiser was not provided with a survey. Th subject's lot size was obtained from RealQuest and the Miami-Dade Property Appraiser's web site. A current survey is recommended in order to determine if any adverse easements and/or encroachments exist. Based upon an inspection of the surrounding neighborhood, the subject property appears to be in compliance with current zoning.

GP Land : Summary of Sales Comparison Approach

At the time of inspection, recent sales of vacant lots in the subject's neighborhood that were similar to the subject property in size were not available. It was therefore necessary to expand the sales search and to analyze older sales as well as distant sales in other neighborhoods in Coral Gables. Improved sales were also considered and their structures extracted wherever necessary.

Comparable sale No. 1 had a home on the site that was built in 1948. After the purchase it was soon demolished to make way for new construction making the sale, in essence, a land purchase. The new has since been built on the site.

Due to the scarcity of land sales, an improved sale had to be used and its improvement extracted to arrive at a site value estimate. Comparable sale No. 2 is an existing one-story, Mediterranean style home originally built in 1945. The residence contains 2,692 SF of living area and two-car garage. Replacement cost new was calculated at \$403,800 and its effective age was estimated at 25 years. The property's remaining economic life is believed to be 30 years. A corresponding adjustment on the sales grid was made to extract the improvement from the purchase price in order to arrive at land value estimate.

Comparable sale No. 3 had a home 1951 home on the site when it sold. Like comparable sale No. 1, the existing home was demolished soon after purchase. The new residence is currently under construction on the site..

The adjusted sales prices of the comparable sales range from \$879,400 to \$942,800 and support the opinion of value of the subject property in the mid range at \$915,000, or \$67.96 per square foot.

Market Value

The definition of market value was obtained from the Federal Register Part VI, Interagency Appraisal and Evaluation Guidelines; Notice/Vol.75, No. 237, Friday, December 10, 2012.

Market Value means the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

- (1) Buyer and seller are typically motivated;
- (2) Both parties are well informed or well advised, and acting in what they consider their own best interests;
- (3) A reasonable time is allowed for exposure in the open market.
