

**Rita A. Teutonico, Ph.D.**

Associate Dean of Research  
College of Arts, Sciences & Education  
Florida International University

Associate Dean of Research at Florida International University and faculty advisor for FIU's Climate Reality Campus Corps section, which she helped establish. She has guided many successful interdisciplinary research awards, including a \$5M, NSF-funded Center focused on water quality. Before FIU, she was Director of Research Development at Utah State University and co-led Utah's \$20M statewide water sustainability program. She served at the National Science Foundation for 10 years, where she held senior-level positions, including Senior Science Advisor for Integrative Activities and Deputy Division Director. She led many interdisciplinary initiatives, including Human & Social Dynamics, Climate Research Investment, and the \$500M Science, Education & Engineering for Sustainability (SEES) priority area. Before NSF, Dr. Teutonico was Associate Professor of Integrated Science & Technology at James Madison University and worked as a research associate in the biotechnology industry.
