

## SUMMARY OF REVISIONS PER BOARD REVIEW ON 6-24-21.

As per comments by BOA, the following revisions have been made in the hope it will satisfy all comments made:

**FOOTPRINT-** The existing driveway was widened to 20' from 14', as requested, for easy egress of second car. The connection to house has same architectural elements of existing house in back and front. Will show at meeting.

**ELEVATIONS-** Windows adjusted on the North Elevation and the amount of Windows were reduced on Second Floor Balcony area.

Existing vs. proposed elevations were fixed and added for easy distinction.

The Shower is a request from owner and wants it to stay. There is enough headroom under stair ( dimension added on Elevation) due to fact that we must have a min. of 11'-0" ceiling height at garage due to Client will add lifts for his car collection.

Zoning and Historic have approved with little comments for BOA approval. Final submission of drawings for Permit will go to them again for Final approval, once BOA approval. All revisions requested by BOA, have not changed any previous Zoning or Historical approvals.
