**CASE FILE COA (SP) 2021-013:** An application for the issuance of a Special Certificate of Appropriateness for the building currently on the University of Miami Main Campus referred to as “**Pentland House - Building 34**” located at 1238 Dickinson Drive, legally described as all of the “Apartment Building 34 (Pentland)” as now existing, laid out and in use, the same being a portion of Tract 5 of Amended Plat Portion of Main Campus University of Miami, according to the Plat thereof, as recorded in Plat Book 46 at Page 81 of the Public Records of Dade County (now Miami-Dade County), Florida. The application requests design approval for an addition and alterations to the structure.

A motion was made by Mr. Fullerton and seconded by Ms. Spain to approve the project with four amendments.

- 1) To separate the stair wall from the slump wall.
- 2) To accept the board of Architects’ recommendations and have them worked out with staff for review and approval.
- 3) To accept the return of the wall on the back for the glass separation between the existing building and the new glass piece on the second.
- 4) To add to the slump wall the entirety of the façade of the existing building in at least its proportion with a horizontal element at the top where the roof would be, and where the metal louvers are to at least have some sort of a metal screening in a proportion to those metal louvers.
- 5) For staff to work out a solution that would also show the memory of (without impeding or causing any trip hazards or danger inside) where exactly the length of where the other two walls were.

The Historic Preservation Board’s reason for the approval of the addition and alterations to this structure, is that the buildings have been recently altered and do not serve the function as they were intended, and the original dedication was of a grouping of buildings of which there’s already a similar service building as part of that existing grouping of buildings.

The motion passed (Ayes:9; Nays: 0).
