Coral Gables Exhibition at the CES 2020 Smart Cities Expo.

[Coral Gables featured its Smart City technology and economic opportunities at the largest technology show in the world. We were the only city in the United States exhibiting at this year's Consumer Electronics Show (CES 2020). With more than 170,000 people representing over 160 countries, CES was the perfect setting to expose Coral Gables to global companies, top tech startups, and major and emerging industries under one roof. The Coral Gables team at the CES conference met with foreign trade delegations, industry innovators, and researchers from around the world who were interested in learning more about how Coral Gables is leveraging its smart city initiatives to improve quality of life and enhance its business environment. <https://www.facebook.com/cityofcoralgables/posts/10157376110897182> <https://www.coralgables.com/news/post/7862/>]
